## FORMER RESIDENT RECEIVES HIGH HONOR

Francis Kirkham Appointed  
Director of Child Welfare  
Association of The U. S.

The following paragraphs were taken from the Salt Lake Desert News and speak eloquently of the achievement of another "Mormon" in the national field of education. Mr. Francis Kirkham mentioned in the succeeding paragraphs is a brother of A. W. Kirkham, well known local citizen. Mr. Francis Kirkham is a former resident of Raymond.

### HONORS WORTHILY WON

All who know him—and that means no small army—will feel like congratulating Francis W. Kirkham, superintendent of schools in the Granite district, Salt Lake County, on his appointment as educational director of the National Child Welfare association. He goes to New York to assume his new duties July 1, until which time he is under contract with the Granite school board; and even after that date he will operate, for a time at least, under a leave of absence, the board being unwilling to accept his resignation. This shows that he is appreciated no less at home than abroad; it is a deserved compliment to a faithful official who has altogether made good.

The district and the community will lose Mr. Kirkham's services with regret. His record in connection with youthful vocational education and with child training has been brilliant. In these subjects he is a recognized leader and one of the best authorities in the country. He is a tireless worker, a human dynamo for energy, a type of activity known as "a live wire". It goes without saying that he will make a great record for himself in the nation wide field into which he is now to enter, and the news, along with his host of friends, will watch his success with confidence and interest.

### LARGE ACREAGE READY FOR CROP

Acreage ready for 1929 crop in Alberta amounts to 3,652,599 acres according to the report issued during the past week by the Dominion Bureau of Statistics. This includes 2,732,599 acres of summerfallow and 850,000 acres of new breaking. As compared with the previous year, these figures show an increase of 100,000 acres of new breaking and a decrease of 112,274 acres of summerfallow. It is estimated however that the amount of fall plowing done in 1928 considerably exceeds that of 1927 so that on the whole, Alberta will this year have in readiness for crop the largest acreage of any year in its history.

### IRRIGATION CROPS VALUABLE 1928

The total value of agricultural production on the Lethbridge Northern Irrigation Project in 1928 is placed at \$1,545,253. While the value of livestock and dairy produce on hand and sold during the year increased from \$887,248 in 1927 to \$1,175,366 in 1928, the value of field crop production shows a considerable decrease as the result of severe hail damage which occurred during the season.

The station formerly owned by J. D. Hall and now in possession of the Garden City Oil Company has been turned around and the entire building is being renovated. This work will be completed this week and the place ready for business next week.

## Irrigation In Town Subject For Discussion

In all probability the question of removing irrigation from the town or at least from the places where it is causing serious damage to roads will be the subject of discussion at the next council meeting. The up keep of roads in this town is a big problem at the best and it is felt that the removal of irrigation would aid materially in reducing the cost of this and give us better roads.

Another feature of this problem is the damage being done to land by bringing the alkali to the surface. In many places trees and grass has been entirely killed out and many garden plots are becoming so saturated that vegetables will not grow. This problem is one that will interest everyone and an open discussion is invited.

### Capitolian Quartette

The Capitolian Quartette will make their debut at the Capitol Theatre next Friday and Saturday April 5-6. Upon their first appearance their numbers will consist of a series of Old Time melodies. This offering will be in conjunction with the screening of Clara Bow in her latest star vehicle "The Fleets In" come and meet the boys.

### PER CAPITA WEALTH HIGH IN ALBERTA

Alberta stands second among the provinces of the Dominion in its per capita national wealth being exceeded in this respect only by British Columbia, according to figures just issued by the Dominion Bureau of Statistics. As regards the provincial distribution of wealth, Ontario ranks first with an estimated agricultural wealth of \$9,130,189,000 and Quebec second with an estimated wealth of \$6,658,108,000. The western provinces however lead in per capita wealth. British Columbia holds first place with a per capita wealth of \$3844; Alberta second with \$3608; Saskatchewan third with \$3559 and Manitoba fourth with \$2957.

### NEW TREATY UNDER WAY

Definite action by the British Government on the proposed arbitration treaty between Great Britain and the United States is expected by officials at Washington to be taken shortly. The new treaty would replace the Root arbitration treaty, signed between the two countries in April, 1908, which automatically expired last June.

Drafts of a treaty similar to that which the United States had signed with other nations were submitted to the British ambassador, Sir Esme Howard, late in 1927, but to date the British government has taken no action. In the interim it is understood the British foreign office has been consulting with the dominions.

The new treaty confines the subjects which are expected from arbitration to much closer lines than the Root treaty. The only exceptions in which arbitration would not be allowed are questions of domestic nature those involving a third party; those which might interfere with the traditional attitude of the United States under the Monroe doctrine, and obligations of the British Empire under the covenant of the League of Nations.

### SHORTER DISTANCE TO EUROPE

The world is being made smaller not only by automobiles and aeroplanes, but by shorter routes between its chief centres. A table of distances recently compiled shows that the Hudson Bay route will effectively shorten the distance between the grain fields of Western Canada and the markets of Europe. For example from Saskatoon to Liverpool via the Great Lakes and the St. Lawrence is 4,878 miles but from Saskatoon to Liverpool via the Hudson Bay Railway and Churchill will be 3,783 miles, a saving of 1,095 miles. From Edmonton to Liverpool via St. Lawrence is 5,224 miles, but by way of the Hudson Bay the distance will be 4,182 miles a saving of 1,042 miles. The Hudson Bay Railway, now being built by the Canadian Government, to Fort Churchill on the Hudson Bay, therefore promises to be an important factor in reducing distances from the Canadian prairies to the markets of the world.

### THE MEXICAN SITUATION

Honors appear to be about even in the Mexican revolt, with claims of successes made by both Federal and rebel leaders. Juarez just across the border from El Paso Texas, was captured by the rebels after a five hour fight, during which a hail of bullets fell on American soil. On the other hand, the Government reports that General J. M. Aguirre who was defeated at Vera Cruz and fled with a handful of followers has telegraphed an offer to surrender if given safe conduct out of the country. The Government replied that his surrender must be unconditional.

### MAY APPOINT PRINCE AS REGENT

Although King George continues to make favorable progress toward recovery it is considered unlikely that he will be able to undertake duties of state before May or June and there fore will be unable to dissolve Parliament prior to the general election. As it is expressly stated that the councillors of State who have been functioning for His Majesty during his illness shall not dissolve Parliament it is probable that the Prince of Wales will be appointed Regent with full power to act for his father until His Majesty is fully restored to health.

## RAYMOND 1st WARD "M" MEN WIN INTERSTATE BASKET BALL CHAMPIONSHIP

### Spring Is Here

#### CLEAN UP

There is no sure sign of spring, but spring should be a "sure sign" of the arrival of that time for the community to clean up. There is no superstition or prophesying about this clean up sign.

When warm weather has come to stay until cold weather returns in the autumn every owner of property and tenant should instinctively feel it his duty to remove the evidences of winter's ravages and to aid and augment nature in her work of re beautification.

Every spring clean-up program should include the disposal of winter's accumulation of litter and decayed vegetation, repairing and repainting of buildings, and landscape gardening. Landscape gardening is no longer associated with large estates alone.

Clean lines about the person or the home costs nothing. A community clean-up need involve no expense, except of a moderate amount of labor on the part of the householders. If there ever were excuses for uncleanness they were removed long ago.

What is the compensation of a community-wide campaign? It improves the general health of the community by removing the deposits that are breeding places of disease germs and disease carrying insects. A clean town is a better place in which to live than one that is unsanitary and unsightly. And the best community advertising is the appearance of being "cleaned up", pointed-up and planted-up.

### INCREASED ACREAGE FOR BEET CROP

A considerable increase is reported in the amount of land which will be planted to sugar beets this spring in the southern part of the province. Loading dumps will be built this year at Iron Springs and Picture Butte in order to facilitate the handling of the increased crop of beets expected from these districts. Two carloads of beet seed are now in storage in the company's warehouse, awaiting delivery to growers.

BILLY ARMSTRONG

The youngest piper in Canada, who blew himself to the Highland gathering at Banff. See him smiling—and the rows of medals and a Billy may be good, but he has a long way to go, for, 'tis said, bagpipes and the violin are unique in this respect, that a performer on either instrument has never finished learning. Harold Eustace Keys, musical director for the Canadian Pacific Railway, who contributed largely to the success of the Banff festival, and who is the authority for this statement, added that another point is that the bagpipes are a certain index of a player's physical and emotional condition.

The local first Ward basketball team won the Interstate Championship in the "M" men division last Saturday night at the High School by a score of 37-21 in the second game of a series. They lost the first game by 3 points and with the points here gave them the series with a 13 point margin.

The game was fast clean junior ball with the locals leading all the way. The Leavitt boys were unable to score when they did get a chance.

The local crew composed of G. Kirkham, B. Nalder, B. Card, W. Van Orman and A. Hagne are a group of coming basketball stars.

P. W. Parks Lethbridge jeweler, donated a handsome cup for the winners in this event. Mr. Parks did this to further the interest of clean sport.

### Local Happenings

The death occurred last Monday night of Dean Anderson 5 year old son of Mr. and Mrs. Roy Anderson. He has been suffering from diabetes for a number of years. The sympathy of the community is extended to the bereaved parents. Funeral services were held on Thursday.

As we go to press the Alberta Wrestling Championships are being held at the local high school gym. Contestants from various parts of the province are entered and a promising array of youthful talent is prepared to take the mat. Full details will be given next week.

Mrs. S. B. Card entertained a group of 24 at bridge party last Wednesday evening. The guests report a very enjoyable evening.

Reports are that while we are basking in the sunshine and the March wind, Utah territories are lying under ten inches of snow.

Karl Shield, son of George Shield, was operated on last Wednesday for appendicitis. The latest report is that he is doing nicely.

Bishop Harker and party of the Magrath first ward passed through Raymond Thursday enroute to Stirling to look over the new chapel under construction there. They are contemplating building a new chapel at Magrath.

Mehew Bros. are building a new modern blacksmith shop on the south side of their hardware store this spring. Work on the foundation will commence in the near future.

The forms are being placed ready to receive the concrete for the foundation at the new second ward chapel site. The work of finishing this structure will be pushed to completion as rapidly as possible.

In last weeks issue of this paper there appeared an article regarding the system of prices to be used at the Opera House. In this article the price for matinees for home dramatists stated as \$4.00. This was an error and should have read \$5.00.

Miss Iola Harding and Mrs. Ada O'Brien are spending the easter holidays at Tubar with relatives.

The local students from the normal school at Calgary spent this week teaching at the various rural schools in this district. After Easter they will return to normal to finish their course.

### Here and There

(259)  
Although Canadians have been styled strong "silent" men there seems little to support the reputation in the recent announcement that they are the world's greatest telephone conversation-alists. There are 1,269,987 telephones in Canada, recently published statistics disclose, allowing for a phone for every eight persons. If all the conversations that took place during the past year were placed end to end they would be heard in Mars, for every citizen held on an average of 221 conversations during 1928. Presumably this does not include wrong numbers.

One of Montreal's first big buildings that was demolished to make room for one of the latest skyscrapers downtown has appeared on an entirely new site, to the amazement of the citizens. So carefully was the building taken down that scarce a score of new stones were required to complete its reconstruction on its new lot.

Up to December 31, 1928 the Canadian Pacific had spent in colonization and Canadian development work, land settlement, etc., nearly \$85,000,000 of its own money.

Sir Charles Gordon, G.B.E., president of the Bank of Montreal, has been appointed to the board of directors of the Canadian Pacific Railway to fill the vacancy caused by the resignation of Mr. J. K. L. Ross. Senator the Hon. F. L. Belque, also, has been appointed a member of the executive committee of the board.

A shipment of animals that will resemble the cargo of livestock on Noah's Ark will take place shortly from Moose Jaw Wild Animal Park, when a number of buffalo, mule deer, elk and other animals will be sent to the Rocky Mountain National Park at Banff, Alberta.

Everyone in Canada is worth \$2,700! That at any rate, is what government figures show, the aggregate national wealth for 1928—\$26,691,482,000—working out at that amount per person. Agriculture is the largest single item, and the western provinces come first in the highest per capita wealth of any part of the Dominion.

The Canadian Pacific Railway, in co-operation with the Manitoba Department of Agriculture, Seed Branch, Dominion Department of Agriculture and the Manitoba Agricultural College, has provided two good seed cars and a poultry car, which is travelling through that province. There are demonstrations of grasses, clover and corn, and poultry displays, while accompanying lecturers talk on the importance of good seed and forage crops, and lecture on the rearing of chickens, turkeys, etc.

### A FEW TIMELY HINTS

If a woman had any sense there would be more bachelors.

Some neighbors will borrow everything including trouble.

The best way to find your missing kinsfolk is to get rich.

The hard thing about making money fast is making it first.

Love makes the world go round the bend and park in the lane.

Lots of people think the world owes them five or six livings.

A soft answer doesn't turn away as much wrath as a hard look.

Being popular doesn't leave much time to make friends.

When picking your friends be careful not to pick them to much.

Most of the work is done by the people who are too nervous to loaf.

You don't have to nurse a grouch very much to make it grow.

Most of the people who have nothing to do make the mistake of doing it.

People who talk in their sleep should tell the truth while awake.

The Lethbridge "Y" Aces defeated Calgary last week for the Intermediate championship of the province.

This was the final game of the season for the Aces and they came through without a loss.

Constant daily testing and blending of the world's choicest teas give Red Rose Tea its inimitable flavor and never-varying goodness. Every package guaranteed.

# RED ROSE TEA "is good tea"

RED ROSE ORANGE PEKOE is extra good  
In the best package—Clean, bright aluminum

## One Nation, Two Cultures

The Dominion of Canada is a great heritage. It has many great problems to solve in order to achieve its destiny. Before Governments and people can successfully cope with these problems the citizenship of the Dominion must become imbued with, fully accept, and earnestly practice the "Spirit of Confederation" which animated the leaders in the public life of this country sixty odd years ago. The names and memories of the Fathers of Confederation are held in honor, not only for what they achieved, but because of the true patriotism expressed through real sacrifice by which union became an accomplished fact.

It is no light matter to speak of the Spirit of Confederation. It was a very real thing. It breathes through every utterance of the men who found it necessary to sink political differences, submerge personal views and convictions, abandon policies dear to their hearts, and accept compromises falling short of what they desired. But they did it, knowing that only so could disaster for British and Canadian interests be averted and the future of the northern half of the continent under the British flag be assured. It was this spirit which alone made Confederation possible and carried it successfully through the stormy early years.

This same spirit is just as vitally necessary in the life of Canada today as it ever was in the past. Without it the Dominion could not have had its being; without it the Dominion cannot continue to exist.

The great challenge which Canada presents to the world at large, and, of course, most vitally of all to her own people, is not in the material realm of trade and commerce, but in the spirit of the people of the Dominion composed as they are of two great races, two distinct forms of religion, speaking two languages, and the product of two cultures. Canada's challenge to the world is to be found in our success or failure to consistently live up to the Spirit of Confederation and make it a living vitality in the life of the Dominion. This is Canada's challenge to the world because the issues of world peace or war are wrapped up in the solution or exactly similar problems in the nations of Europe and across the Pacific.

The problem before the Fathers of Confederation was whether the existence of two races, two languages, two cultures in Canada was an insurmountable obstacle to the creation of a single united nation, and whether such a nation could exist on the basis of that fact. Their decision was that such a nation could exist, and they laid down the formula in the British North America Act. Confederation became an accomplished fact, and it has not only survived but progressed and grown to an amazing extent.

There is one Canadian of French race and language for every two Canadians of English race and language. How shall both feel that common love for home and soil which is the soul of nationality? Both races have traditions, a past of their own. On what principle and to what ends may both races have a common national future?

These vital questions cut clean through the whole of our national life today, just as they did prior to and at the time of Confederation. Shall the people of Canada, with so vast an estate to develop in common, with so great a part to play in elevating the quality of living, and so noble an opportunity awaiting them alike in the British Empire and in the sphere of international relations, always be faced with the menace of racial discord, of attacks by one race on the integrity of the other, of recourse to embittered discussion of rights that should be secure, or wrongs that should have been corrected, when scores of social and economic problems are crying out for solution? Race is like a car left with its engine running. The slightest touch will put it in gear and set it speeding towards some bitter accident.

In the nineteenth century Lord Durham's policy was the "obliteration" of the French-Canadian. The policy of the Fathers of Confederation was the recognition of the identity of both races, both languages, both religions, both cultures. Their ideal was one nation, two cultures; one nationality, two languages; one loyalty, two races.

Which policy was practical? To obliterate a whole people, or to form a nationality in which the identity of two peoples might be secure, free, developing? The Fathers of Confederation had the only practical policy, the only policy that would ensure peace, make the progress of Canada possible, and establish a new nationality in British North America.

### Small Suns Compose Stars

Partially Eclipse Each Other Every Twenty-Four Hours

In Castor's solar system there is a star of the ninth magnitude known as C. It is composed of two small suns, each about half as massive as our sun and but little more than half the diameter, though of much greater density. They appear to be dying down into the planetary stage, or burned-out condition, for they shine with a reddish light and possess a much lower surface temperature than our sun. This pair of twin worlds in the making are at an average distance apart of 1,700,000 miles, and they appear to revolve round one another at great speed in about twenty hours, partially eclipsing each other every time, as seen from the earth. We do not see the effect of these eclipses until forty-three years after they occur, owing to the great distance (2,730,000 times that of our sun) of this marvellous solar system of Castor.

### VITAMINS

Everyone needs them to support growth or to protect the body against germ-infection.

### Scott's Emulsion

abundantly rich in vitamins is of great importance in all run-down conditions of the body. Scott's Emulsion builds strength.

Scott & Bowne, Toronto, Ont.

W. N. U. 1775

### Fellowship Honor For Manitoba Professor

Dr. Buller Will Be First F.R.S. In Prairie Provinces

Dr. A. H. Reginald Buller, head of the department of botany, University of Manitoba, has been selected for the fellowship honor by the Royal Society of London, England. He is one of 15 candidates on whom the honor will be conferred in May, and will be the first F.R.S. in the prairie provinces.

Dr. Buller has been carrying on research work in connection with wheat for 32 years and his valuable contributions to science in this respect caused him to be singled out for the honor. He is the author of various books dealing with wheat rust fungi.

**It Has Many Qualities.**—The man who possesses a bottle of Dr. Thomas' Electric Oil is armed against many ills. It will relieve a cough, break a cold, prevent sore throat; it will reduce the swelling from a sprain, relieve the most persistent sores and will speedily heal cuts and contusions. It is a medicine chest in itself.

There are 320 foreign consuls and consular agents in Canada with the doyen of all J. M. Owen, the United States consular agent at Annapolis Royal, N.S.

In one month, last year, 100,000 New York families, involving at the lowest estimate 300,000 people, moved from one apartment to another.

Milard's Liniment prevents flu.

### Wool By Aeroplane

Australian Company Considering This Means Of Transport

Transport of wool by aeroplane is being considered by Australian Air Services, Ltd., in districts where camel caravans are now employed. The company in Melbourne has already received a request from a station owner in Northern Victoria for specifications and an estimate of cost of freight plans to carry his wool over a difficult 500 miles of the journey to the nearest seaport. The transport of freight in the district in which the station is situated costs about £30 per ton, and a plane will be able to transport freight over the distance in a day whereas several weeks are often required.

### Toes Made Comfortable Sore Corns Removed

Quick, safe relief is almost instantaneous if you apply PUTNAM'S CORN EXTRACTOR. Shoes won't pinch or hurt. One single drop of Putnam's stops the pain. A few applications make the corn dry up and drop off. Putnam's Corn Extractor gives satisfaction. Thousands use it every day. Get a bottle from your druggist. Refuse a substitute for "Putnam's" the one sure relief for sore corns.

### Can See Two Oceans

The inhabitants of Costa Rica say that the only place commanding a view of the Atlantic and Pacific ocean is the summit of Mount Irazu, situated in Cartago Province. The mountain is 12,600 feet high, and the Costa Ricans assert that on a clear day it is not difficult to see the waters of both oceans with the naked eye.

### DO YOU SUFFER FROM RHEUMATISM

For Relief You Must Reach the Root Of The Trouble In the Blood

Sufferers from rheumatism who have found their condition unrelieved or actually growing worse while using other remedies, would do well to try Dr. Williams' Pink Pills. The tonic treatment with this medicine has proved in thousands of cases that it builds up the blood to a point that enables it to cast out the rheumatic poisons through the regular channels, the bowels, kidneys and the skin. When this is done rheumatism is banished and as long as the blood is kept pure and rich there will be no return of the trouble.

The Dr. Williams' Pink Pills do what is claimed for them is proved by the case of Mrs. Ettie A. Munia, Sarnia, Ont., who says: "I was a helpless invalid for a year with inflammatory rheumatism. I had medical treatment and took mineral baths, but with no result. Naturally I felt utterly discouraged, and was suffering greatly. Then one day I read in a local paper of a case similar to mine, in which great praise was given to Dr. Williams' Pink Pills and I decided to give this medicine a trial. It is now with the greatest pleasure I write to tell you that in less than two months after starting the use of Dr. Williams' Pink Pills I was able to get up and walk about as well as ever I did. I can never praise these pills too highly and I hope that in making my experience public it may benefit some other sufferer."

A very useful book "Building Up the Blood," will be sent free on request by The Dr. Williams' Medicine Co., Brockville, Ont.

Dr. Williams' Pink Pills are sold by all druggists or will be sent by mail, post paid, on receipt of price, 50c. a box. Try them today.

Many western Canadians will make a tour of the Maritime Provinces in June, under the auspices of the "New Outlook," official publication of the United Church in Canada, and the Canadian National Railways.

Neighbor: "What is your son taking at college?"  
Dad: "All we can send him."

### COULD NOT WORK FOR MONTHS

Restored to Health by  
Lydia E. Pinkham's  
Vegetable Compound

Port Elgin, N. B.—"For three months, I was nervous and weak with tired feelings and could not do my work. A friend advised me to take Lydia E. Pinkham's Vegetable Compound and I have got good results from it and recommend it to others."—LILA TAYLOR, Port Elgin, N. B.

This dependable medicine is sold by druggists everywhere.

### Sure Of Hoover's Support

League Of Nations Has Good Friend In U.S. President

What stand will President Hoover take in regard to United States co-operation with the League of Nations? Supporters of the League, while they have practically abandoned any hope that the States will become an active member of the League, feel that in Mr. Hoover they have the strongest support of its policies since the regime of President Wilson.

They base this belief on the fact that in 1919, President Hoover was an urgent advocate of United States entry into the League and that while bound by loyalty to his party to take an opposite point of view he will always remain at heart a strong protagonist of League ideals.

It cannot be said that League supporters felt they had a genuine friend in Mr. Coolidge. Practical ignorance or tepid acquiescence was all that could be expected from the former chief executive. Always he appeared to be dominated by the small town point of view of the narrowest type of American in his dealing with the League and constitutionally he seemed incapable of thinking on an international plane.

While the new president is also bound by party considerations it is believed that by every means in his power he will strive to represent that sizable minority in his country who fervently advocate closer co-operation with the League in maintaining world security.

Many have been relieved of corns by Holloway's Corn Remover. It has a power of its own that will be found effective.

### Recipes For This Week

(By Betty Barclay)

#### BREAD PUDDING DESSERT

- 1 package lemon junket.
- 1 pint milk.
- 4 slices bread.
- Butter.
- Raisins.

Remove crust from bread, butter lightly and cut in small cubes. Divide the cubed bread among dessert dishes and add a few seeded raisins. Warm the milk to lukewarm—not hot; add the lemon junket. Stir until dissolved; pour over bread. Let stand in a warm place until firm—then chill. Sprinkle with a mixture of sugar and cinnamon before serving.

#### SCALLOPED DISHES

Pour over layers of well-seasoned meat, fish or vegetable enough medium cream sauce to cover. Sprinkle well with buttered crumbs and bake until brown. When combined with starchy dishes such as potato or macaroni, use thin cream sauce. Medium cream sauce calls for 1 cup milk, 2 tablespoons flour and 2 tablespoons butter. Thin cream sauce calls for 1 cup milk, 1 tablespoon flour and 1 tablespoon butter.

There is nothing repulsive in Miller's Worm Powders, and they are as pleasant to take as sugar, so that few children will refuse them. In some cases they cause vomiting through their action in an unclean stomach, but this is only a manifestation of their cleansing power, no indication that they are hurtful. They can be thoroughly depended upon to clear worms from the system.

### Big Job For Typemakers

Complete Set Of Chinese Type Will Take Seven Years To Produce

Few will envy a certain Shanghai printing establishment which has been working for three years to make a complete set of type, so that 10,000 Chinese characters (most of China's alphabet) can be printed.

It will exceed by several thousands the number of characters now being used in the printing of the largest of Shanghai's Chinese newspapers.

Since the single symbol, in Chinese, may express a whole idea, an imposing array of type is required by the smallest printing establishment, and the newest alphabet, which will provide each of the 10,000 characters in five sizes, will be a boon.

Each "letter" must be photographed and the impression from the resulting plate tediously tooled by hand. Four more years will be required to complete the work.

#### Time For Everything

Have a time and place for everything, and do everything in its time and place, and you will not only accomplish more, but have more leisure than those who are always hurrying, as if vainly attempting to overtake time that has been lost.

Milard's Liniment For Coughs and Colds.

## PROOF OF DYES is in the dyeing!

Words won't dye a dress, or coat, or sweater. It takes real anilines to do that. That's why Diamond Dyes contain from three to five times more anilines than any other dye—by actual test.

It's the anilines in Diamond Dyes that do the work; that give the colors such brilliance; such depth and permanence. It's real aniline that keeps them from giving things that red-dyed look; from spotting or streaking.

Next time you have dyeing to do, try Diamond Dyes. Then compare results. See how soft, bright, new-looking the colors are. Observe how they keep their brilliance. Your dealer will refund your money if you don't agree Diamond Dyes are better dyes.

The white package of Diamond Dyes is the original "all-purpose" dye for any and every kind of material. It will dye or tint silk, wool, cotton, linen, rayon or any mixture of materials. The blue package is a special dye, for silk or wool only. With it you can dye your valuable articles of silk or wool with results equal to the finest professional work. When you buy—remember this. The blue package dyes silk or wool only. The white package will dye every kind of goods, including silk and wool. Your dealer has both packages.

**Diamond Dyes**  
Easy to use Perfect results

### New Type Of Flying Craft

Being Built For British Air Ministry and Is Nearly Ready For Tests

The London Mail says that a flying machine called a "heliogiro" is being built at the order of the British air ministry and is nearly ready for tests.

It is a development of the helicopter, and was invented by Vittorio Isacco, who in 1917 collaborated with Pescara in making five helicopters.

The new machine is designed to ascend and descend vertically and to hover motionless in mid-air.

### Traffic Is Increasing

Two New Steamers Ordered For Vancouver-Victoria Night Service

To meet increased freight and passenger traffic on the waters of the Pacific coast, two new vessels of the "Princess" type for night service between Vancouver and Victoria have been ordered by the Canadian Pacific.

It is announced by Captain C. D. Nerontsos, manager of the British Columbia Coast Steamship service. The two sister ships are to be delivered next year, each having accommodation for 430 passengers.

## Yours for the Asking

THESE bulletins and pamphlets were prepared and printed for your use. They contain a great deal of very valuable information—worked out by the staff of scientists employed by the Dominion Department of Agriculture. If any or all of them would help you in your work, or in improving your home surroundings, you may secure copies without cost—simply by marking with an "X" the ones you would like, filling in the coupon below, and mailing this advertisement to us. No postage is required.

Bulletin No. 106  
"Stern Rust in Western Canada"—practical methods of rust control—rust-resistant varieties.  
Pamphlet No. 83  
"The Combined Reaper-Thresher in Western Canada"—costs of operation—experiences of present owners—points to consider in buying.

Circular No. 62  
"Mosquito Control in Canada"—tells how to treat the breeding places of these pests so they cannot multiply.  
Bulletin No. 60  
"Annual Flowers"—lists and descriptions of all the annuals that will grow in Canada—varieties recommended for different sections.

## Strong Evidence That Indicates The Real Worth Of Dominion As a Field For Mineral Industry

Among the evidences of Canadian progress in 1928, none is more gratifying than that which again reveals, in stronger light than ever, the real worth of the Dominion as a field for mineral industry. The preliminary figures for the value of the country's mineral output, recently issued by the Dominion Bureau of Statistics, reach a peak well above any previous level.

There are two physical facts that carry a broad and special interest in connection with the steady ascent of Canada's mineral production in late years.

One is to found in the sheer variety of minerals that enter into our annual output. In financial circles the wisdom of "diversity of investment" is a byword, and it may well be said that Canada's strength as a mining field likewise lies largely

in "diversity."—In the fundamental fact that Nature has invested the Dominion with mineral assets which, in variety, are matched by few, if any, countries. It is to this wide range of resources that the Canadian mining industry mainly owes both its enjoyment of present prosperity and its assurance of stable, well-sustained growth.

A second physical fact of no less importance exhibits itself in the breadth of territory afforded by the Dominion as a fair ground for more intensive prospecting. A major portion of Canada has so far been subjected only to cursory study, but even so, ample information has been gained as to the potential mineral wealth of the less known regions of the country to confirm the Canadian mining industry in its title to an ample field for further development.

## British Stock Farmer Uses Artificial Light

Ultra-Violet Rays Keep Animals In Good Condition

Ultra-violet light is reported to be a boon to the British stock farmer. Besides maintaining cows, race horses, etc., in good health during the sunless months of winter, it is improving their condition so that they bring a higher price in the market, according to V. M. Weall, a south of England farmer, in Surrey, who experimented with pigs. Twelve pigs were treated with ultra-violet light for three minutes daily when they were 10 to 12 weeks old, and the time of treatment was gradually increased to 20 minutes. This was maintained until the animals were sold at the age of 20 weeks. Twelve similar pigs were kept as controls without light treatment. All 24 were sold on the same day, and in every case the irradiated pigs sold for a higher price than the untreated animals. The extra money obtained for each pig was said to be 14 times the cost of the operation of the quartz lamps which were used for the irradiation.

## Healthy Herds In Dominions

Packing House Inspection Shows Cattle In Splendid Condition

In fifty-six packing plants during the past fiscal year, inspectors of the Dominion health of animals branch examined 1,150,000 cattle, 610,000 sheep, 2,600,000 swine and 208,000 poultry and passed upon their suitability for human consumption. All carcasses found seriously diseased were condemned as unfit for food, while others in which the disease was localized had the diseased portions condemned. It is a fine commentary on the excellent health of Canadian live stock and the efficacy of the Dominion regulations to maintain that health, that only a very small proportion of the carcasses examined were condemned—1.59 per cent. in the case of cattle, and 0.27 and 0.26 per cent. in the case of sheep and swine. That the cattle percentage was even so high may largely be attributed to the fact that reactors from the tuberculosis eradication campaign were included in the inspection figures. There is to be no let up in the campaign against live stock disease, however, as the Hon. W. R. Motherwell has announced the opening of a new laboratory at Ottawa to be used for research work, particularly into new methods of eradicating bovine tuberculosis. Calmette vaccine, which it was announced would immunize calves against tuberculosis infection, has already been under test for five years at Ottawa, so far with somewhat negative results, but the experiments will be continued with the larger facilities now available until the claims of the discoverer of the vaccine are either proved or disproved. It is encouraging that the output of meat animals from the commercial herds of the country continue to show such a splendid percentage of healthy animals.

## Great Britain Forging Ahead With No Sign Of Decadence As Some Critics Have Predicted

### Keeping Pace With Settlement

Many New School Districts Organized In Province Of Alberta

Fifty-six new school districts were organized in the province of Alberta during 1928, bringing the total number of districts in the province up to 3,497. The total school enrollment is now approximately 160,000. Eighty-one new one-room schools and thirteen new two-room schools were built in country and village districts last year.

A feature of the report of the Department of Education is the reference to the increase in the number of students enrolled for technical education. In the Institute of Technology, at Calgary, enrolment last year reached a total of 1,745. Approximately 500 new students were enrolled during the year for correspondence courses. Over 1,000 more pupils wrote the departmental examinations than in any previous year. Of all the units written in the high school grades 75.19 per cent. were passed successfully.

### Seeds Will Be Sun-Tested

Will Test Seeds For Purity At World's Grain Exhibition To Be Held In Regina

Grain exhibits entered in competition at the World's Grain Exhibition, to be held in Regina, in 1932, will be tested for purity in nature's laboratory. Although the exhibition itself will not open until August, the seeds entered in competition must reach the grounds before April, so that they may be sown in plots to determine the purity of the various varieties.

Prizes aggregating nearly a quarter million dollars will be awarded for grain and seeds, and exhibits from all the world's grain growing countries are expected to be entered in competition.

### B.C. Purebred Poultry Sent To Switzerland

Birds For First Shipment Supplied By Victoria Man

The first shipment of British Columbia purebred poultry ever sent to Switzerland, was made by the B.O.P. Poultry Breeders' Association of British Columbia recently. The shipment consisted of ten White Leghorn yearling hens, all blood-tested and with B.O.P. records of from 200 to 225 eggs. The birds were bred and supplied by N. E. Plaxton, Victoria. They were shipped on the steamer "Notre Dame" which took them to Havre, France. From there they went to Switzerland by train.

### One Way Out

The way to avoid having unwelcome guests for week-end visits is to have no spare bedrooms, according to a man who has given a great deal of thought to the uninvited-all-night-guest problem. "Extra bedrooms in a house invite company as surely as a peach tree in a yard invites boys," he said. "When you build a new house don't add too many bedrooms if you wish to lead a quiet life."

### Electricity From Mud

Besides pies and baths, mud is to be used as a source of electricity. A power station has been erected at Karnap, Germany, which will utilize the mud from the Ems River. This mud has a heat value, when extracted and dried, which corresponds to that of lignite. The dried product will be used to heat steam for the engines driving the dynamos.

Phillip Whitwell Wilson, formerly a member of parliament for South St. Paneras, famous as an author and war correspondent, recently gave an address in the Town Hall, New York. He said:

All past empires have declined and fallen. Will that be the fate of the British Empire? No! With a population of forty-five millions she governs 450 millions. At the outset of the Great War her area was about thirteen million square miles. Today it is about a million more. We must remember that empires in the past lacked means of communication. Rome built admirable roads, but their value is trivial in comparison with our telegraphs, trans-oceanic telephones, quick trains, ships and airplanes. Our Empire is the first that recognized that when colonies grow up it is best for them to begin house-keeping for themselves. We have a civil service which is superb; our judiciary never stood higher in ability and dignity, testifying to the rising character of the people, the efficiency of our courts. In education there is a keener and more intelligent interest than in any other era of our history.

To the advancing prosperity of the British Empire the Great War came as a staggering blow. In 1914 our national debt was three-and-a-half billions sterling; it is now 38 billions. In 1914 our taxes were not quite one billion; they are now three-and-a-half billions. In England taxation is about \$80 per head annually, as against about \$30 in the United States. The latest annual report of her commerce shows England exporting four-and-a-half billions and importing six billions. The difference was in large part made up by income from foreign investments, receipts from shipping and insurance, with goodly amounts from tourists, most of them trans-Atlantic.

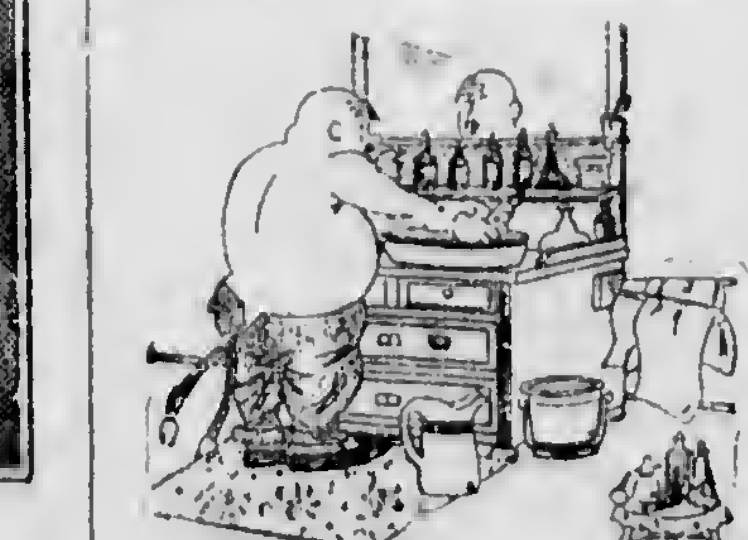

As to unemployment: about one-ninth the toilers in Great Britain are out of work. Usually the figure has stood at about one-twentieth. And yet, partly because of an increased population, there are at this hour more people at work in Great Britain than there were in 1914, and they are better clothed and fed. Since the Armistice about a million new dwellings have been built, about 600,000 more are needed. Acute depression is felt in Wales and in Northern England, especially in the cotton and woollen trades, in iron, coal and shipbuilding industries. The textile mills before the war enjoyed wide markets in Russia, India and China. These have been lost. In coal mining the situation seems hopeless. In 1927 the estimated loss in this trade was \$15,000,000, in operating 3,000 mines by about 1,500 companies, liable for royalties to about 4,000 land-owners.

As to remedies: Every week about a thousand miners leave their old homes. Every year about five thousand miners are trained for other trades, and are slowly absorbed by other districts of England. Notwithstanding the depression in shipbuilding there are today on the stocks ships which will have a total tonnage of one-and-a-half millions. In the steel trade there is anxiety regarding the growth of competition with France, where the production may soon overtake that of Great Britain, now about eight million tons a year.

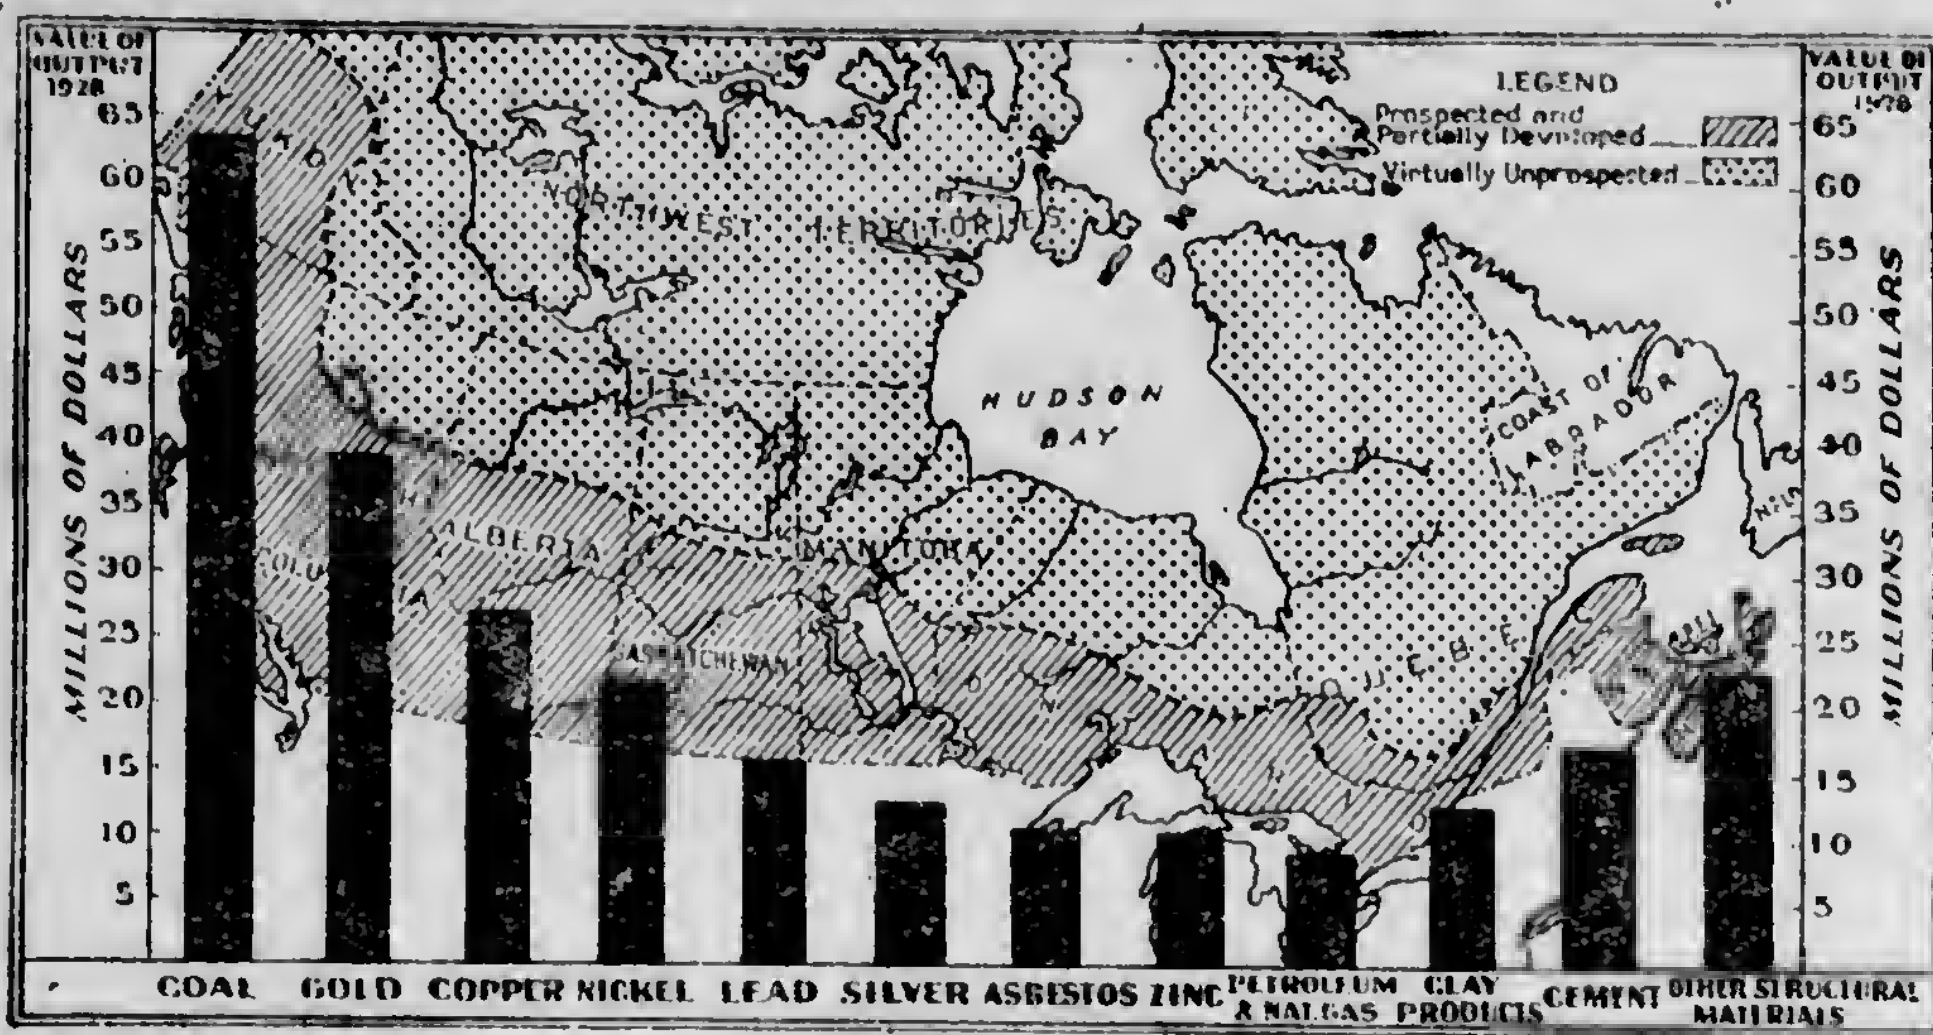

Often the question is asked, "Is England to share the fate of Holland and drop to secondary rank?" That would be no ignoble destiny. No nation on earth is more worthy of respect than Holland. A nation may be great without being the most populous or the richest.

Football Coach: What experience have you had?  
Freshman: Well, last summer I was hit by two autos and a truck.

Great Britain provides a market for approximately 2,800,000,000 buttons a year.

Newrich: "I use 10 brands of hair wash, I am manicured, pedicured, I get my scent straight from Paris. If this goes on, I shall be having a bath." Bertie Blair, Berlin.

### Origin Of Butter

Swaying Motion Of Camels Caused Sour Milk To Turn To Butter

The camel is the real inventor of butter, according to the results of research made by the National Dairy Council. The origin of this food was traced to the custom of the Arabs who carried across the desert on the backs of camels sour milk in skin bags. The swaying motion of the camels caused the contents of the bags to turn into butter, which the Arabs first used as a lotion for the skin. Later they made butter by tying the bags of milk to fast horses and racing the steeds up and down for several hours. Bags of milk were also laid on the ground and beaten until their contents were churned into butter.

### China Bans Toy Pistols

Forbids Importation Because Bandits Use Them To Terrorize People

Because bandits in interior China use them to rob and terrorize the country folk who do not know that they are only toys, the Nationalist Government has issued a regulation forbidding the importation into China of toy-pistols and air guns.

"Such toys, while not regarded as harmful and are imported only as playthings for children," explains the order, "are known to have been frequently used in the interior of China by bandits and gangs of ruffians to terrorize the ignorant country folk. For this reason, hereafter, importation of toy pistols and air-guns, either by Chinese or foreign firms, will not be permitted."

Student—"And poor Harry was killed by a revolving crane."  
Englishwoman—"My word! What fierce birds you have in America."

"Since I have been exercising my chest has expanded two centimetres a week."  
"Then a year hence you will need a larger house."—Eustige Blatter, Berlin.

W: N. U. 1778

### WINNIPEG NEWSPAPER UNION FASHIONS

No. 899—Graceful Lines. This style is designed in sizes 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44, 46, 48, 50, 52, 54, 56, 58, 60, 62, 64, 66, 68, 70, 72, 74, 76, 78, 80, 82, 84, 86, 88, 90, 92, 94, 96, 98, 100, 102, 104, 106, 108, 110, 112, 114, 116, 118, 120, 122, 124, 126, 128, 130, 132, 134, 136, 138, 140, 142, 144, 146, 148, 150, 152, 154, 156, 158, 160, 162, 164, 166, 168, 170, 172, 174, 176, 178, 180, 182, 184, 186, 188, 190, 192, 194, 196, 198, 200.

No. 944—Entirely New! This style is designed in sizes 34, 36, 38, 40, 42, 44, 46, 48, 50, 52, 54, 56, 58, 60, 62, 64, 66, 68, 70, 72, 74, 76, 78, 80, 82, 84, 86, 88, 90, 92, 94, 96, 98, 100, 102, 104, 106, 108, 110, 112, 114, 116, 118, 120, 122, 124, 126, 128, 130, 132, 134, 136, 138, 140, 142, 144, 146, 148, 150, 152, 154, 156, 158, 160, 162, 164, 166, 168, 170, 172, 174, 176, 178, 180, 182, 184, 186, 188, 190, 192, 194, 196, 198, 200.

No. 127—Popular Coat Dress. This style is designed in sizes 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44, 46, 48, 50, 52, 54, 56, 58, 60, 62, 64, 66, 68, 70, 72, 74, 76, 78, 80, 82, 84, 86, 88, 90, 92, 94, 96, 98, 100, 102, 104, 106, 108, 110, 112, 114, 116, 118, 120, 122, 124, 126, 128, 130, 132, 134, 136, 138, 140, 142, 144, 146, 148, 150, 152, 154, 156, 158, 160, 162, 164, 166, 168, 170, 172, 174, 176, 178, 180, 182, 184, 186, 188, 190, 192, 194, 196, 198, 200.

No. 948—Important School Frock. This style is designed in sizes 6, 8, 10, 12, 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44, 46, 48, 50, 52, 54, 56, 58, 60, 62, 64, 66, 68, 70, 72, 74, 76, 78, 80, 82, 84, 86, 88, 90, 92, 94, 96, 98, 100, 102, 104, 106, 108, 110, 112, 114, 116, 118, 120, 122, 124, 126, 128, 130, 132, 134, 136, 138, 140, 142, 144, 146, 148, 150, 152, 154, 156, 158, 160, 162, 164, 166, 168, 170, 172, 174, 176, 178, 180, 182, 184, 186, 188, 190, 192, 194, 196, 198, 200.

No. 135—Smartly Simple. This style is designed in sizes 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44, 46, 48, 50, 52, 54, 56, 58, 60, 62, 64, 66, 68, 70, 72, 74, 76, 78, 80, 82, 84, 86, 88, 90, 92, 94, 96, 98, 100, 102, 104, 106, 108, 110, 112, 114, 116, 118, 120, 122, 124, 126, 128, 130, 132, 134, 136, 138, 140, 142, 144, 146, 148, 150, 152, 154, 156, 158, 160, 162, 164, 166, 168, 170, 172, 174, 176, 178, 180, 182, 184, 186, 188, 190, 192, 194, 196, 198, 200.

No. 846—Dainty Bolero. This style is designed in sizes 6, 8, 10, 12, 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44, 46, 48, 50, 52, 54, 56, 58, 60, 62, 64, 66, 68, 70, 72, 74, 76, 78, 80, 82, 84, 86, 88, 90, 92, 94, 96, 98, 100, 102, 104, 106, 108, 110, 112, 114, 116, 118, 120, 122, 124, 126, 128, 130, 132, 134, 136, 138, 140, 142, 144, 146, 148, 150, 152, 154, 156, 158, 160, 162, 164, 166, 168, 170, 172, 174, 176, 178, 180, 182, 184, 186, 188, 190, 192, 194, 196, 198, 200.

All patterns 25 cents in stamps or coin (coin preferred). Wrap coin carefully.

### Wanted To See It

The recruit had been at the naval training station two weeks and had spent most of his time digging ditches, chopping trees, and filling depressions. Finally, he sought his immediate superior.

"You see, sir," he complained, "when I joined the navy they said I'd see the world, and for two weeks I've been doing nothing but rearrange it."

### Another Proof Of Intelligence

Charles Minick, a road patrolman, lay helpless in his bachelor home, near Cornwall, Wisconsin, suffering from a violent attack of rheumatism. Minick called his Airedale dog to the bedside, tied a message to the dog's collar, and repeated the name of a neighbor several times. The message was delivered by the animal, and Minick was taken to town and given medical care.

### First Ten-Pounders

Trained farm workers who are headed for the West, where they will contribute to the success of the 1929 harvest. They came over on the "Melita," the first large group under the ten-pound rate, and were directed to farm work by representatives of the Canadian Pacific Railway.

**Good**

Only choice leaves grown at high altitudes go into the blending of Blue Ribbon Tea. That is why its flavour is so uniformly excellent. Insist upon getting it from your grocer—refuse substitutes of inferior quality.

## WORLD HAPPENINGS BRIEFLY TOLD

The Prince of Wales won nearly all the principal prizes at the fourth annual show and sale of Shorthorn bulls at Birmingham.

Admiral Alfred Von Tirpitz, who led the Imperial German navy during the Great War, was 80 years old March 19.

Lord Lovat has resigned from the chairmanship of the Overseas Settlement Committee owing to ill health. He has now almost completely given up public life.

The Turkish government has paid foreign bondholders the first installment on the Ottoman debt, the total of which is \$482,000,000 and is to be paid within 27 years.

French volunteer firemen who make up the bulk of the fire fighting forces are attempting to organize the first firemen's world's fair, to be held in Paris in 1929.

The British treasury has received \$20,000,000 as the sixth installment on the French war debt, and \$725,000 as the seventh installment on the Italian debt.

In order to enable him to become acquainted with public affairs from the diplomatic angle, Prince George, the King's third son, has taken up temporary duties in the foreign office.

Graham Jardine, 55, former branch manager of the Royal Bank in western Canada, and for the last five years connected with a Toronto brokerage firm, died suddenly in that city.

The government of Cuba has formally notified the Canadian government that it accepts the agreement concluded at Ottawa, in January, in regard to the division of the short radio waves in the North American area.

Conquest by the air by feminine pilots was advanced by Mrs. Louise McPhetridge Thaden, 23, of Oakland, California, when she remained aloft in the lonely cockpit of her biplane for 22 hours, 3 minutes and 12 seconds to establish a new endurance flight for women.

Worms in children, if they be not attended to, cause convulsions, and often death. Mother Graves' Worm Exterminator will protect the children from these distressing afflictions.

### Creatures Of Habit

We are unreasonable animals many of us. The person who sputters like a hot tea kettle because he is required to button his raincoat every morning and unbutton it every night—day after day, month after month, year after year—a long and dreary round of monotony wails like a fire siren when one little button comes off.

### The Right Idea

Uncle Ezra: "My nephew, the aviation student, writes me as how he did his first 'solo' on Wednesday. He was 2,000 feet in the air."

Uncle Benn: "Well, if a fellow is going to practice singing, that's the place for him to do it!"

## A Health Saving Reminder

**Don't Wait**  
until you get the  
**Influenza**  
USE

## Minard's Liniment

At the first sign of it. Its Healing Qualities are Amazing. THE OLD RELIABLE.

W. N. U. 1778

## NEW APPOINTMENT

R. HENDERSON,

who has just been appointed Canadian National Railway's Industrial Agent for the Alberta district, with headquarters in the station at Edmonton. Expanding industries in the west, and eastern concerns which are looking to the opening of western branches, will be assisted by Mr. Henderson, who will do for Alberta what Mr. Roblin and Mr. Chambers, both recently appointed, are doing for the Saskatchewan and Manitoba districts. Mr. Henderson entered the services of the National system in 1912.

### To Improve Maple Industry

Producers in Canada Will Ask Legislation From Government

An organization has been formed of Canadian producers and manufacturers of maple products which will submit to the Dominion Government a request for legislation to improve the condition of the industry. The chief demands will be for more stringent laws against adulteration; inspection to prevent adulteration; and a campaign of publicity to secure greater consumption of maple products in Canada.

The Royal Canadian Golf Association has decided to hold the Canadian Amateur Championships on the Jasper Park Lodge course this year from August 19 to 24.

## SUNDAY SCHOOL LESSON

MARCH 31

### THE FUTURE LIFE (Easter Lesson)

Golden Text: "Be thou faithful unto death, and I will give thee the crown of life."—Revelation 2:10.

Lesson: Matthew 25:31-46; Mark 12:26, 27; Luke 24:1-12; John 14:1-6; 1 Corinthians 15:3-20, 50-58; 1 Thessalonians 4:13-18; Revelation 22:1-5. Devotional Reading: Psalm 23:1-6.

### Explanations and Comments

The Resurrection Of Christ, Luke 24:1, 2.—Early on Sunday morning after the crucifixion of Jesus, Mary Magdalene and other women came to the tomb where His body had been laid, to embalm it with the spices they had prepared. All the way they had been worrying about the great stone that blocked the entrance to the tomb. They could not move it, and who would be there to move it for them? But when they came within sight of the tomb, lo, they saw that the stone had been rolled away. Christ had risen. "Why seek ye the living among the dead?" were the words they heard. Was it true? Jesus was not there, but where was he? They were full of fear and full of joy, half fearing and half believing. And then they met him. There he was, the same Jesus, and their fear and doubt vanished. He was risen, even as He said.

We no longer fear what lies beyond the grave. We know that we do not really die, that we pass through death to another life. We know that we shall live again, and in that knowledge we lose our fear and find hope and joy.

"May Easter Day  
To thine heart say,  
'Christ died and rose for thee.'"

"May Easter night  
On thine heart write  
'O Christ, I live to Thee.'"

The Promise Of Christ, John 14:1-3.—"Let not your heart be troubled; believe in God, believe also in Me." In spite of everything the disciples must trust in the goodness of God and in their Lord's own loving thought of them. Faith is still the cure for heart-trouble, the sure reliance in anxious moments. Not a nominal faith in the existence of God, but an active, overmastering belief in His goodness and wisdom, and in His overruling all things for good, is the faith that will keep the heart from despair in times of danger and dread.

"'Twas the Master Himself who said  
To the sorrowful little band,  
Facing an hour of darkness  
That they could not understand."

To Asthma Sufferers. Dr. J. D. Kellogg's Asthma Remedy comes like a helping hand to a sinking swimmer. It gives new life and hope—something he has come to believe impossible. Its benefit is too evident to be questioned—it is its own argument—its own best advertisement. If you suffer from asthma get this time-tested remedy and find help like thousands of others.

### Contention Is Right

Issuance of laundry receipts in Chinese will be illegal in New York State, if a bill recently introduced by Assemblyman Mark C. Kelly, of Utica, is passed. It provides that every laundry establishment, upon receiving clothing, shall issue a receipt in English, itemizing each article received. Said Assemblyman Kelly: "A Chinese laundry ticket does not mean a thing to the recipient if he is a one-language American."

A Corrector Of Pulmonary Troubles. Many testimonials could be presented showing the great efficacy of Dr. Thomas' Electric Oil in correcting disorders of the respiratory processes, but the best testimonial is experience, and the Oil is recommended to all who suffer from these disorders with the certainty that they will find relief. It will allay inflammation in the bronchial tubes.

Cloves came from the Indies and take their name from the Latin *clavus*—meaning a nail, to which they have a resemblance.

The onion first came from India. The onion was almost an object of worship with the ancient Egyptians.

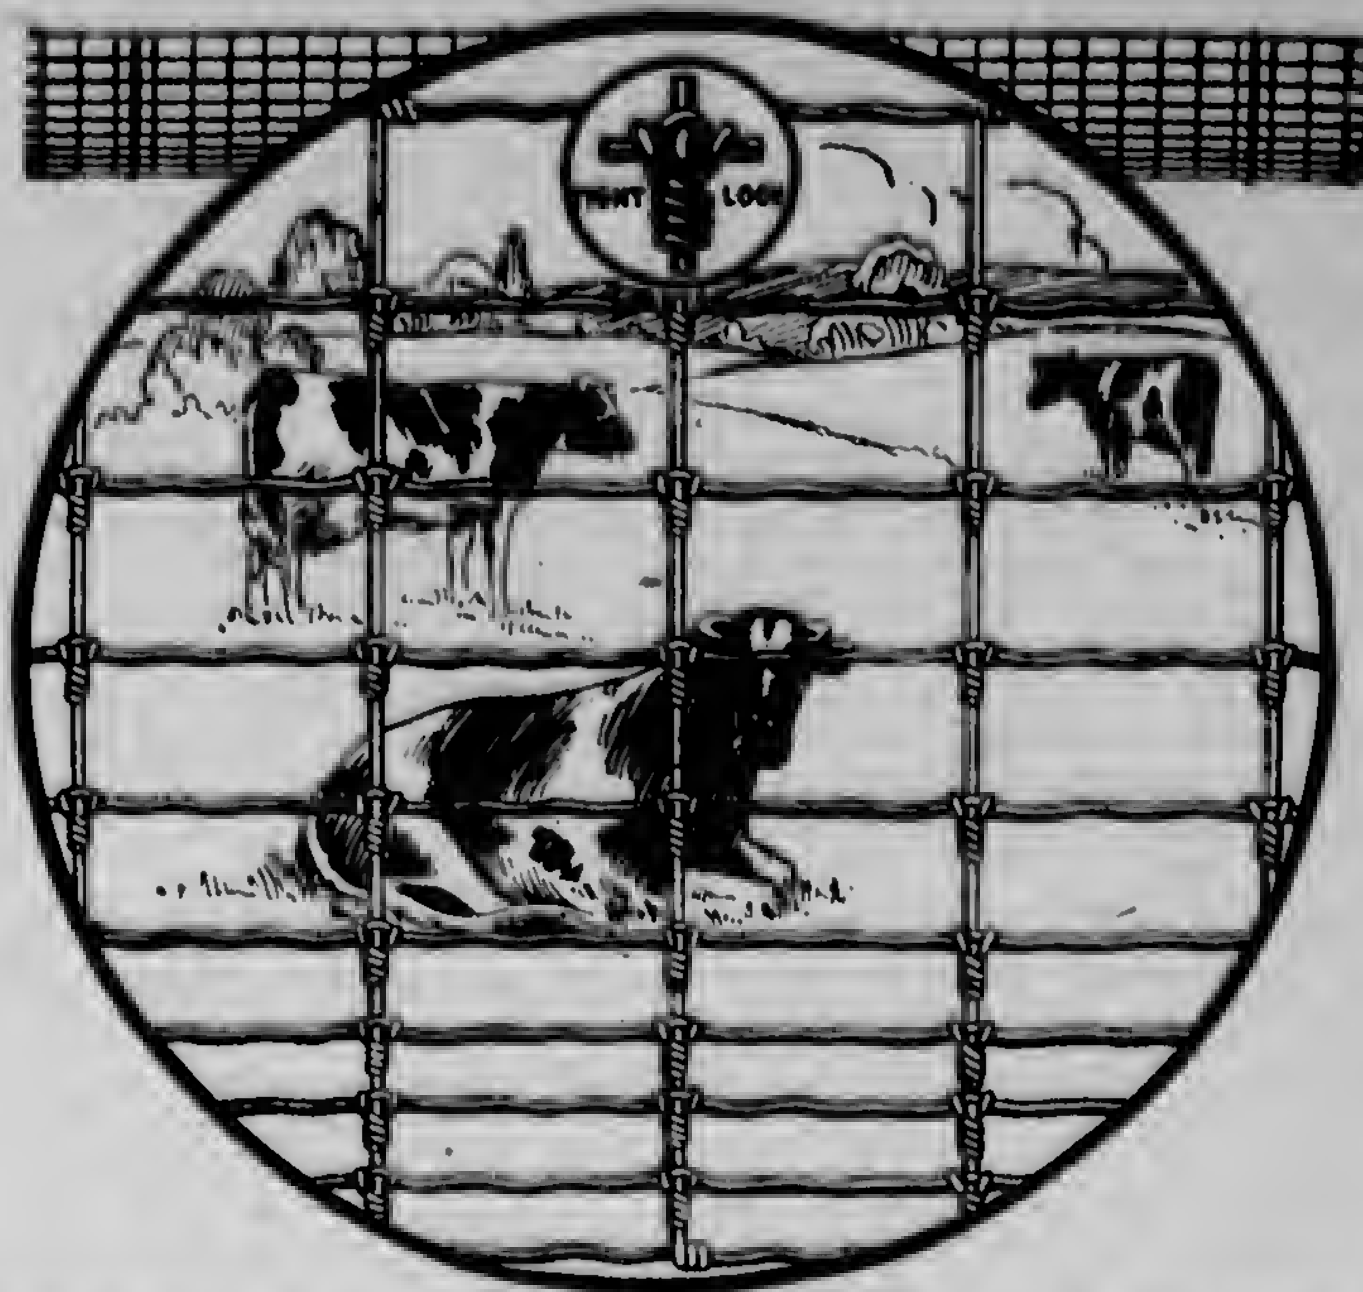

## Could Not Sleep Heart Would Start Pumping and Pounding

Mrs. Fred. P. Averill, 136-12th Ave., Calgary, Alta., writes:—"I was bothered so much with my heart I could not sleep. I would wake up in the night screaming, and my heart would start pumping and pounding. A neighbor lady told me to try

so I started taking them and I can truthfully say I am a different woman. Altogether I only took two boxes."

Price 50c a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

## DEFIES EXTREMES OF WEATHER!

Always straight, strong, neat and tidy in every extreme of weather! That is why you will see Frost Tight Lock Fence everywhere you travel in Western Canada. Low temperatures and scorching suns have no effect on it. The Tight Lock holds! Frost galvanizing resists rust. Frost Fence guarantees more than a dollar's worth of endurance for every dollar you invest. Investigate Frost Fence now!

### When Cunarders Carried Cows

Vast Difference Between Past and Present Of Steamship Travel

Amazing facts are given by E. D. Breton, of London, England, who writes of the past and present of steamship travel, and refers to the famous old "Britannia," which was the first steamer to cross the Atlantic on schedule, and which was the product of the imagination of Sir Samuel Cunard, of Halifax, Nova Scotia, founder of the Cunard Line.

For instance: the Britannia was the wonder ship of her day, yet described by the inimitable Charles Dickens as having a saloon "not unlike a gigantic harem," with sleeping berths comparable only to coffins. Her staff comprised two stewards, a cook, a kind of cabin boy and the navigation crew. She carried a cow abroad to supply fresh milk. Her bathroom would have disgusted any traveller of today, and may have disheartened many prospects of those middle eighties.

Gone is the Britannia. Sir Samuel is gone too. Today the monuments to the man and his crude little steamers are the famous Cunarders which ply across the Atlantic to and from Great Britain, and Europe, and Canada, and the United States, and cruise into the seven seas of the world with their red funnels topped by a black band.

For instance: the world's fastest liner, the Cunarder "Mauretania," voyages along at about 30 miles per hour. The Cunarder "Berengaria" houses 4,000 souls, and carries hundreds of bathrooms for passengers who can either pay the same old Britannia ticket price for accommodation undreamed of in those days, or pay as high as \$6,000 for luxury that kings could not get in days gone by. Passengers can now hold swimming parties in the ship's pool, stage balls, or send facetious messages by wireless to friends ashore. They tread on the Cunarder "Aquitania's" three miles of carpet, benefit by her 10,000 electric lights, and 1500 push bells, and are cheered by her 2,000 yards of silk damask wall coverings. Hectic travellers cross the Atlantic in about four days from New York on the Mauretania and marvel at her fame, which has lasted 22 years, and at her record of total mileage which runs into the million.

### Sultan's Son a Fiddler

After looking in vain for a rich American girl to marry and restore his shattered fortune, Prince Abdul Kadir, the son of Sultan Abdul Hamid, who today might be sultan of Turkey had not Mustafa Kemal made that country a republic, has sought permission from the minister of labor to join a gypsy orchestra as a violinist.

It is estimated that British workers spend \$150,000,000 yearly in travelling between home and place of employment.

The peach originally came from Persia.

Use Minard's Liniment for the Flu.

### Will Maintain High

Quality Of Beef

Grade Must Be Satisfactory To Receive Government Brand

As soon as the necessary inspectors can be appointed at local points, the Federal Livestock Department will inaugurate a policy of branded beef, with the Federal Government responsible for the maintenance of high quality of the brands which it approves. In order to qualify under this scheme of Government certification, the beef must have been slaughtered in a Government-inspected abattoir and bear the Government Inspector stamp. It shall then be submitted to the Government Inspector and, if satisfactory grade, the brand of quality will be affixed to it. The beef must then be retailed through an establishment approved by the Government.

### Reindeer For Canada

A cable from Stockholm states that a consignment of 300 live Swedish reindeer has been shipped to Canada through a Norwegian port. This is the largest shipment of the sort ever to go forward.

**What Will  
you  
do**

**When your  
Children Cry  
for It**

There is hardly a household that hasn't heard of Castoria! At least five million homes are never without it. If there are children in your family, there's almost daily need of its comfort. And any night may find you very thankful there's a bottle in the house. Just a few drops, and that colic or constipation is relieved; or diarrhoea checked. A vegetable product; a baby remedy meant for young folks. Castoria is about the only thing you have ever heard doctors advise giving to infants. Stronger medicines are dangerous to a tiny baby, however harmless they may be to grown-ups. Good old Castoria! Remember the name, and remember to buy it. It may spare you a sleepless, anxious night. It is always ready, always safe to use; in emergencies, or for everyday ailments. Any hour of the day or night that Baby becomes fretful, or restless, Castoria was never more popular with mothers than it is today. Every druggist has it.

**Fletcher's  
CASTORIA**

## Will Make Survey Of Short Routes Between Winnipeg and Churchill

Ottawa.—As a result of a conference between Manitoba Liberals and Hon. Charles A. Dunning, minister of railways and canals, held here recently, just before the adjournment of the House of Commons, the railway department has undertaken to make a complete survey of all the suggested short routes between Winnipeg and Port Churchill, and to make available all the details necessary for a decision in this regard to be reached.

While the railway department has undertaken this survey at the request of the Manitoba Liberals, it is clearly understood that the department and the government are in no way committed to construct the short route as a federal project or to contribute in any way to its construction. The survey is being made to assist Manitobans in solving a problem which has given much concern in recent months.

While the short route to Churchill was the chief point discussed at the conference there was also an interchange of opinion between the minister and the members on the question of freight rates to Churchill. Mr. Dunning informed them, and he is already on public record in this regard, that he intended to put in Crow's Nest Pass rates on grain and flour from the outset. He thought that there could be no question on this point, looking at it from a purely legal point of view.

The railway to Churchill would be similar to the lines running east to Port William, crossing substantially similar country and carrying similar freight. The Crow's Nest rates east to the head of the lakes would compete with rates on the Hudson Bay railway and these would have to meet this competition under the discrimination clauses of the railway act. He pointed out that Crow's Nest Pass rates had been applied westward across the mountains to Vancouver, and the case for the Churchill road would be infinitely stronger than for these western routes.

In regard to general freight rates class and commodity rates, etc., he thought that these would be fixed by the railway commission as a result of an investigation which would be made. He gave the interesting information that the Saskatchewan government already has sized the situation up and has a freight rate expert busily engaged preparing a case for submission to the board dealing with their rates. It was presumed that the Dracken government would take similar steps, although neither Mr. Dunning nor the Manitoba Liberals were aware of the actions of the Manitoba government in this regard.

### Alberta House Prorogues

Edmonton, Alta.—The third session of the sixth Legislature came to a close here, March 20, at 5:45 o'clock after His Honor the Lieutenant-Governor William Egbert had consented in the name of His Majesty the King, to the passage of a large number of bills and had formally accepted on behalf of His Majesty the supply granted the House.

## Wheat Crop Marketing Is Discussed By Ottawa Parliament

Ottawa. The marketing of Canada's 1928 wheat crop came before parliament in no uncertain way recently. Following reports from the west of dissatisfaction with the work of the board of grain commissioners, and the way the crop was handled this year, three resolutions were placed on the order paper of the House of Commons. One asked that in grading wheat, its protein content be taken into consideration. A second referred to the mixing of grain, and a third condemned the board of grain commissioners for issuing the so-called "hybrid" ticket. It was on a recommendation of the committee on agriculture that it be empowered to investigate all these points at one time that the discussion burst forth into the Commons and forced the budget debate to give way.

To the various and severe criticisms which have been levelled at the board of grain commissioners, Hon.

## Plans Another Trip Over Niagara Falls

French-Canadian Willing To Dare Death a Second Time

Niagara Falls, N.Y.—Jean Lussier, French-Canadian, who successfully made the perilous trip over the falls last summer, encased in a rubber ball, probably will dare death a second time on July 4.

Lussier went over the falls in a specially constructed ball in daylight with more than 75,000 persons witnessing the feat. He was fished from the river two hours after starting his trip by William "Red" Hill, veteran riverman.

Lussier is planning to make the second trip in a vehicle which he calls a "parlor hall." The hall will be six feet in diameter, electrically lighted and so constructed that the occupant will be able to remain upright during the entire journey. It will be heavily padded inside to insure escape from any serious injury.

## Miners Caught By Explosion

Three Hundred Trapped But Greater Number Escape

Parnassus, Pa.—Entombed by an explosion, between thirty and fifty miners were unaccounted for in the Kinloch mine of the Valley Camp Coal Company. More than two hundred others were underground when the blast occurred, but as hours passed they found their way to the surface through an entry five miles from the main shaft.

More than 300 miners were in the workings when the explosion occurred. Of these the greater number were believed to have been at work near the main heading and rescue workers feared that they were near the centre of the explosion.

Those who escaped came from an entry about five miles from that known as the Kinloch entry, the centre of the operations.

## Joins Empire Association

Alberta Decides To Affiliate For At Least One Year

Edmonton.—Alberta will join up with the empire parliamentary association, an organization of the various federal and provincial parliaments within the British commonwealth of nations. It will cost us \$500 per year which will be paid for a state fee from the general treasury. The members of the legislature were called together by Speaker Johnson, to consider the question and their decision was to affiliate for at least a year's trial.

### Important Land Deal

Springwater, Sask.—An important land deal has been completed here with the sale by R. H. Bourk, of 15 sections of farm land to a party of Mennonites. The purchase price is said to be around \$90,000. Mr. Bourk is a prominent farmer of this district, having come here in pioneer days.

## Discussing Amount and Duration Of Annuities

Committee Makes Good Start At Reparations Key Problem

Paris.—The experts committee on reparations is making a good start at its key problem—the amount and duration of annuities with which Germany's debt will be paid.

Discussion is strictly semi-official, however, and there are still wide gaps between the hopes and claims of the different parties. But there is a spirit of conciliation in the air which seemed to justify an optimistic outlook on deliberations which soon may reach a plenary session of the committee.

France was credited with the intention of claiming ten billion marks (about \$2,500,000) of an immediate payment which Germany is expected to make.

Belgium, it is stated, will ask reimbursement of six billion marks for alleged worthless forged German currency which the German invaders left behind.

Great Britain's claims in the first payment are expected to total about four billion marks (about \$1,000,000,000). It is understood that Great Britain will claim that previous agreements do not apply to the claims of the dominion and that she expects further to be reimbursed now for what has already been paid the United States on the war debt account.

## Want Short Road To Bay

Manitoba Anxious For Direct Rail Route To Churchill

Winnipeg.—The problems of short and direct railway routes to Port Churchill, on Hudson Bay, from Winnipeg and possible rates for freightage were discussed in the Manitoba legislature.

Immediate action on the part of the provincial government was demanded by W. Sanford Evans, Conservative, Winnipeg. Immediate action was necessary, said Mr. Evans, if the people of Manitoba were to enjoy favorable rail rates to Port Churchill. If a strong move was not made soon the province would find that Saskatchewan, by reason of its Sturgis cut-off, would enjoy more favorable rates.

There are four proposed routes for direct communication with the bay port to be considered. The government, said Mr. Evans, should make a survey. One of the proposed routes might not serve all the requirements necessary, and it was a matter of public policy that this should be done.

## Representative From India

Will Attend National Conference On Education At Vancouver

New Delhi, India.—The National Conference on Education at Vancouver, in April, will be probably the first occasion on which the Indian states have been represented as a separate unit of the British Empire. Lawrence Rushbrook-Williams, foreign secretary of the State of Patiala and noted historian, is the official representative of the native ruling princes and he left for Vancouver on March 22.

### Canadian Bank For California

San Francisco, Calif. Organization of a new bank, the Canadian Bank of Commerce (California), was approved by the state banking commission. The action makes the delegation formed of representatives San Francisco branch of the Canadian Bank of Commerce, a separate entity from the main organization, operating under a state charter.

## URGES TARIFF REPRISALS

Hon. Hugh Guthrie, acting Conservative leader, in the budget debate at Ottawa on March 7, urged retaliation by Canada in the foreshadowed economic brush with the United States.

## Prince Decorated By Master Mariners

Receives Temporary Insignia Of Office While Regular One Is Being Made

London, England.—The Prince of Wales at the annual banquet of the Master Mariners, was adorned with a temporary insignia of office, an ornate badge and chain, while the actual insignia in gold and jewels is being made. It was the first meeting in his official capacity with the body to which the King last year appointed him "master."

Cabinet ministers, ambassadors, and many prominent men were present.

The prince, after an allusion to the presence of the high commissioners of the Dominions, announced a series of proposals to make the company an imperial body by increasing its membership by one-hundred. All of the new members had been master mariners resident in the Dominions. The prince said he regarded the proposal as a very important move and one which would serve as a great imperial link.

## No Transportation Until Fall

Earliest That Passengers Or Freight Can Reach Churchill

The Pas, Man.—There will be no transportation into Port Churchill either of passengers or freight until next fall, declared Major J. G. McLachlan, district engineer in charge of operations of the Hudson Bay Railway in an interview here.

With steel but seven miles from Churchill, there is a great demand for transportation and there are going to be hundreds of people disappointed when they find they cannot get into the Manitoba seaport this spring, stated Major McLachlan.

### Horses Win Against Turtle

Port Arthur, Tex.—Fisherman A. Wiltz hitched four horses to a seine and dragged a 1,350 pound turtle from the Gulf of Mexico. The turtle whose protective shell had been cut, perhaps by a ship's propeller, put up a hard fight before the horses finally won. It was estimated to be more than 300 years old.

### Plan Zeppelin Flight

Berlin, Df. Hugo Eckener, commander of the German dirigible Graf Zeppelin, states that a flight from Friedrichshafen to Rio de Janeiro, Brazil, was being considered for this year.

## Vote On Budget Is Held Over Until After Easter Recess

## Speed Boat Title Captured By Seagrave

English Driver Adds 'Tills To Automobile Racing Laurels

Miami Beach, Fla.—The International Speed Boat racing title went across the seas to England as the result of a race devoid of competition.

Major H. O. D. Seagrave added the water title to his automobile racing laurels when he sent his patched and leaking "Miss England" creeping across the finish line on Biscayne Bay recently five minutes behind Gar Wood's "Miss America VII." He was officially credited with winning the two-beat race with three points, as against two for the United States speed-boat king.

Wood's boat flashed around the two-mile course in the elapsed time of 11 minutes, 45.95 seconds, for an average speed of 61.275 miles an hour. The Englishman finished in the time of 16 minutes, 50.10 seconds, for an average of little more than 42 miles an hour.

The victory went to the English driver on the basis of points scored, Wood having been forced from the first heat yesterday with no points.

## No Disarmament Conference This Year

Earliest Possible Date Will Be Spring Of 1930

Geneva.—League of Nations circles have informed the press that there will be no possibility of holding a general disarmament conference this year.

The earliest date it was declared at which such a conference can be convened will be the spring of 1930, but it is more than probable that it will be well along in the fall before it can be held.

This delay is due purely to the present lack of progress in the preparation for the conference.

It will be necessary it was pointed out that the League's Preparatory Disarmament Commission must have at least two more sessions before agreement can be reached on a draft project for a general disarmament convention.

### A Million Dollar Prize

Shanghai, China.—A three cornered contest among wind and waves, Japanese salvagers and hundreds of Chinese pirates for a prize valued at more than \$1,000,000, is taking place off the China Coast, eighty miles from Shanghai, within the Yangtze estuary. The prize consists of the North German Lloyd steamer "Gelsen" which was wrecked on the treacherous Button Rock.

### Entering Talkie Movie

Toronto, Ethel Catherwood, of Saskatoon, world's champion girl high-jumper, has confirmed a rumor that she was to leave for New York City in a "few days" where she will accept an offer to enter the "talkies."

## Canada's Certificate On Grain Shipments May Be Revised By Privy Council

Winnipeg.—Possibility of Canada's "certificate final" on grain shipments to foreign buyers being challenged in the Privy Council of England, looms up.

It is learned here that because of shipments of American barley to Germany during the season just closing, which were finally found to be "seab diseased" and which caused the death of stock to which it was fed, there is quite a possibility of a legal review of the validity of the contract which exists between Canadian and American shippers and the London Corn Exchange, acting as the intermediary on such shipments.

As the facts are now known it is stated that, following the death of livestock after feeding on this "diseased" American barley, a board of arbitration was set up in England under the rules of the Corn Exchange before whom the German grain exchanges presented their complaint.

This arbitration board, it is learned, has now completed the taking of evidence and will submit the facts, in all probability, to an English court in order that the contract between the London Corn Exchange and the foreign buyers might be tested. It is also learned that no matter how the decision may go an appeal will be taken to the Privy Council.

Under the contract referred to between the trade and the London Corn Exchange, it is provided that the Canadian government grade certificate shall be taken as final; but there is another provision to the effect that this certificate is not a warranty of quality of the shipment unless any defect in the grain is observable upon examination. It is on this provision that the legal representatives of the German grain exchange have taken their case to the British Board of Arbitration, arguing that the defect in the barley shipments from the U.S.A. was observable upon examination and that therefore the certificate, which is the same as the Canadian certificate, is not a warranty of quality.

Should the board of arbitration find this as the fact, it is highly probable that before the Privy Council the Canadian government certificate final might become the subject of close scrutiny, if not, indeed, a legal decision.

The organized grain trade of Canada and the wheat pools of Canada through their central selling agency have it is understood, subscribed to the enquiry by the board of arbitration and the outcome of its findings of fact are being awaited with considerable concern and interest here.

## MY ANGELINE

Evangeline Wells, Grand Prize

Mable Wayne

It is not often that Canada has been the inspiration for popular songs. We sing about "Mileigan," "My Ohio Home," "The Swaine River," but at last the most beautiful portion of Canadian territory has served to inspire a popular song writer just as it did the great Long-

low in other days. Wolfe Gilbert and Mable Wayne have given us "My Angeline," based on the "Evangeline" story and, no doubt, many other Evangeline songs will make their appearance and add to the fame of this quaint Nova Scotia valley of apple blossoms. The authors of "My Angeline" were also co-authors of "Ramona," "Chiquita" and many other popular numbers.

## News Notes

The Stake M. I. A. committee in charge of the track meet to be held next June met this week and decided to add about 10 special events to the usual contest events. These special events will be open to anyone in the district and it is the expectation of the committee to send the winners to the provincial meet at Banff this summer.

The local High School Basketball team left this morning for Calgary where they will engage the Calgary "Y" in the first game of the series for the provincial championship. Fans confidently expect them to retain the cup. The return game will be played here next Tuesday.

Mr. and Mrs. Harold Stevens have moved to Burnwell where Mr. Stevens will farm. Mrs. Stephens departure leaves a very much felt vacancy in the stake Y. L. M. I. A. presidency. This position has not been filled.

Mrs. Emma Costly spent a few days last week with friends in Stirling.

Ad Heggie returned last Monday from Phoenix, Arizona in which locality he has spent the last few months with his sister Mrs. R. W. Skouson.

The marriage of Mr. George Erickson and Miss Genevieve Peterson, both of Stirling was solemnized at Stirling last Monday with Bishop Arthur Fawns officiating.

The business girls are busy making decorations for their big dance to be held next Monday night.

Tuesday night the local high basketball team will play the second game of their series with the Calgary "Y" for the provincial championship at the Opera House.

Mrs. Don Wall spent two days last week doing temple work at Cardston.

Dehlin Bennett left last Tuesday for Red Deer where he will go into the printing business with the former editor of this paper, D. C. Peterson.

George Hutchinson left last Saturday for Idaho Falls where he will attend school.

**ALBERTA FLIER WINS DOMINION TROPHY**

The McKee trophy awarded for the most meritorious flying done in Canada in 1928 has been won by Lieutenant C. H. Dickens of Edmonton. Special mention is made in awarding this honor to Lieut. Dickens, of his flight of 3,964 miles across the Barren Lands last September. During the past month while on a flight to Fort Good Hope, he crossed the Arctic Circle and has since returned to Edmonton from where he is engaged in making regular flights into the far north.

**UNDERTAKE AERIAL SURVEY OF NORTH**

The inauguration of a five year program of air-mapping to cover the greater portion of Northern Alberta along the line of the recommendations made by the Provincial Government is announced by Hon. Chas. Stewart, Minister of the Interior. Special plans will be utilized for carrying on this work as a result of which it is hoped to secure accurate topographical data concerning many of the little known districts in the north of the province. This information will prove invaluable in connection with the greatly increased activity in settlement and mineral developments in the north. A number of ground survey parties will also be employed to work in conjunction with the aerial mapping force.

Shirley Kinsey is constructing a bungalow on his farm just south of town.

Mr. Charles Romeril Sr. is seriously ill at the Galt Hospital Lethbridge.

### WILL COMMENCE SEASON'S PROGRAM OF ROAD CONSTRUCTION

A start will be made on Alberta's 1929-1930 program of highway construction as soon as weather conditions permit, announces Hon. O. L. McPhearson Minister of Public Works. The work to be undertaken will involve an expenditure of some \$1,500,000.00. The graveling of the road between Macleod and Pincher Creek has already been started and a number of other projects will be commenced within a short time.

The following people will journey to Salt Lake City to attend the April quarterly conference: Mrs. Louis Brandley, Mrs. I. B. Roberts, Mrs. Charles Mehew, and Mrs. Christopher Nilsson.

### SILENCE IS GOLDEN

Norman and Lawrence Menard, two youthful highwaymen who kidnapped and robbed Constable Evans of Havlock, Ontario, and Earl Williams, and were captured after a wild automobile chase, are in a position to ponder upon the folly of boastfulness. When arrested, the youths appeared anxious to impress upon their captors the fact that they were bold had hands, with many daring exploits to their credit. Their records were looked up and witnesses were brought from Montreal who identified them as the men who participated in the hold-up and murder of Earle Durham, a coal merchant of Montreal. They were sentenced to Cobourg to five and three years respectively for highway robbery, but will likely be taken to Montreal shortly to face trial for murder.

Mr. Leo VanAssel and family who have farmed for the past number of years on the Brimhall farm south of Raymond have recently moved to the Coaldale district.

### U. G. G. Binder Twine

# Indigestion

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude helps. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate, with no bad after-effects. Once you learn this fact, you will never deal with excess acid in the crude ways. Go learn—now—why this method is supreme.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

### CHAPTER XVI.—Continued

Men hurried to do his bidding. When the stretcher bearers leaned to lift the inanimate body, Hoop-la fiercely interfered. "Let him alone," he said savagely. Stooping, he picked up the light form and bore it down the hill to their bed in the rough log shack. Donald forced a few drops of brandy through the dying man's colourless lips. Blackie stirred feebly. His eyes flickered open and he smiled as he recognized Hoop-la.

"Give me your hand," he whispered faintly. "I'm runnin' my last high-lead, old pal. I guess God'll be good to us rough-necks." He gasped painfully. The irregular breathing ceased; his eyes became fixed and glassy; his jaw sagged.

Hoop-la sat motionless, the hand of his dead friend held in his warm clasp. Slowly his head dropped forward and his big frame shook with dry racking sobs. Doctor Paul came in hurriedly. In answer to the look of interrogation in Donald's eyes, he shook his head sadly.

Donald and Wilkinson tiptoed softly to the door. They were unshaken of the tears that made furrows down their blackened cheeks. Sick at heart, utterly overcome by this tragedy, Wilkinson sank dejectedly to a seat outside the cabin door and covered his face with his hands.

There came a sudden pattering of raindrops that drummed on the roof of the cabin. Wilkinson stood erect with arms stretched wide. "Rain!" he cried. "The merciful rain! Thank heaven!" He stood with face upturned for an interval, enjoying the pelt-pelt downpour, then turned to look in the cabin door, a deep and brooding sadness in his bloodshot eyes.

"Donald," he said gently, "The newspaper account of this fire will mention the fact that a logger was killed. A logger!—yes—men like Blackie are the backbone of this country, the salt of the earth. Will people ever learn?" he continued, in a voice vibrant with deep emotion. He pointed to the blackened skeletons of trees blackened and charred and branchless save for the gibbet-like limbs stuck out from the naked trunks. "Think of it! All this—the smiling out of a valuable life—a verdant hillside changed to a charnel-house of dead trees and blackened stumps on bare rocks—the loss of thousands of dollars worth of valuable timber—all this caused by the careless dropping of a lighted cigarette!"

### CHAPTER XVII.

Donald's announcement that Labor Day would be celebrated at the Lake was received with good-natured approval by the men of the camp, who spoke of the coming event as the "dry" holiday. The rain, which had

brought such blessed relief to the hearts of the guardians of the forest, had cleansed the air of the last vestige of haze that had overhung the valley for the past month.

The morning of the holiday dawned auspiciously. The hot days of August had given place to the mellow sunshine of Indian summer. Through the crystal clear atmosphere the mountains seemed much nearer, standing out sharply against the blue sky. Near the top there had been a fresh fall of snow that had covered the bare ice of the glaciers like a white mantle. The brilliant rays of the September sun were reflected from this virginal covering with a brilliancy that was dazzling to the eye.

Janet arrived for the occasion, bringing with her a score of her friends. All through the previous day the trail from the north had brought strings of cayuses from the Indian Reserve, their dusky riders gaily bedecked in holiday attire. "Klahowya, Klahowya!" they shouted, their coffee-coloured faces lighting up with a grin that betokened a gala day spirit. Their tents dotted the lake-shore, their camp fires glowing cheerfully throughout the night.

The sports committee had arranged a varied list of events. A rowing race between the two camps; a sack race, free for all; a basketball game between the whites and the Indians; a sawing race in which two "buck-ers" from each camp would participate; a hundred-yard dash; a log-rolling contest between a man of the State of Maine and a citizen of New Brunswick. But these were mere preliminaries to the real event of the day, the much advertised horse-race. The men from the other camps, arrayed in their "Sunday clothes" made their appearance early in the day.

Each camp brought its quota of sandwiches and cakes, but the brunt of the work fell on Andy and his assistants, who piled tier upon tier of sandwiches on the long tables under the willows by the lake-shore. The lemonade was in half-barrels at each end of the tables, with a "help yourself" sign attached.

Old hoodlums, with stolid, sombre faces, etched deep with cross-hatching of wrinkles, walked through the throng laden with baskets they were trying to sell. "Mika talka basket," quavered their aged voices as they held forth their wares.

About eleven o'clock Mr. Wainwright appeared alone.

"Where's Connie?" asked Donald.

"As you are aware, Mr. McLean, Connie is very shy. I could not induce her to accompany me."

"That will never do," said Donald quickly. "I am going after her."

"I am afraid that your trip will avail you nothing," smiled Wainwright in his absent-minded way.

Donald borrowed a cayuse and set off up the trail. He hitched the horse at the edge of the clearing and proceeded on foot down the path, his shoes making no sound on the soft dark earth. As he turned a clump of alders and came in view of the cabin he stopped short, arrested by a sight that evidently elicited his amused interest.

Connie stood outside the door before a small mirror hung on the rough log walls of the house. She was attempting to place her heavy hair in a knob at the top of her head. A page out from a magazine was tacked to a log near the mirror. She studied the photograph carefully, then returned to the attack with renewed vigour. But she could not get it to suit her. She tried and tried, but the heavy shining coils would elude her slender fingers and fall in a golden cascade over her slight shoulders. Her efforts to reach a satisfactory result brought her to the verge of tears. She stamped her little foot impetuously. At last she got it arranged in a fair semblance to that of the envied actress. The effect was so startling that Donald fairly gasped. The child of the moment was transformed, as if by a fairy's wand, to a woman of wondrous grace and beauty.

Connie perked her head saucily, then half smiled to show her small milk-white teeth; apparently she was pleased with the reflection she saw in the glass. From the clothes-line she took a flour sack that had been split open and washed to be used for drying dishes. Draping this from her waist line, she pinned it securely. Assuming a haughty pose, she walked past the mirror with a stately, undulating movement. The little artist was so perfect in her mimicry that Donald's lips involuntarily formed the word "Janet." Twice she passed before the tiny mirror with a regal step, her head turning with its characteristic bird-like motion to catch the reflection.

Gradually the queenly pose slipped from her. She stopped abruptly, throwing out her arms with a forlorn gesture. Her golden head fell forward. Two big tears welled from her blue eyes and ran down the small freckled nose. Her small hands plucked convulsively at her faded blue overalls. A sob like a stab pain shook her slender body. One arm came up slowly to cover her tear-wet face as she threw herself face forward on the grass. Her slender shoulders were shaking with such an agony of weeping that Donald's throat felt constricted and his eyes grew suddenly dim.

Her spotted cayuse, grazing nearby, raised his head at the sound of Connie's hysterical sobbing and moved to the small figure of his mistress. With ears bent forward and a look of bewilderment in his soft eyes, he nuzzled her neck with his velvety nose. The sobbing continued, but her brown hand came up to pat his head lovingly.

Donald tiptoed softly back to the trail. He stood for some time with his hand on the saddle, his head bowed in deep thought. "Poor little kid," he said gently, then whistling a lively tune, he slowly retraced his steps to the cabin. He entered the clearing just in time to see Connie as she disappeared in the timber across the field. He did not want her to know that he was aware of her flight, so he knocked loudly on the door and shouted her name. A raven croaked derisively from the top of a dead tree. The pony raised his head to eye him silently. Connie's pet deer came around the corner of the barn, a look of gentle questioning in her beautiful big eyes.

Donald rode slowly back to camp. Connie's distress had touched his heart; her heart-breaking sobs were still ringing in his ears. "It is not that Wainwright does not love his daughter," mused Donald. "It must be that he is very poor."

"Don't see how I can help," his thoughts ran on. "One can't very well suggest to a father that he buy clothes for his child."

Andy rang the lunch-bell, and there was a wild but good-natured scramble for the tables.

A long table had been arranged in the big dining-room for the officials and Janet's party to which Donald had invited Mr. Wainwright.

"Did you find Connie?" queried Wainwright.

"No," lied Donald, "I couldn't find her."

Janet's friends were having a merry time. There was laughter, jesting and gay repartee from all sides. Douglas was in his element, his quips and brilliant sallies keeping the diners in a continual uproar.

As Donald glanced around the big table at the laughing faces of the gay party, he tried to visualize Connie dressed as one of these fashionably-clad girls who represented Vancouver's "younger set." The vision he conjured caused him to smile dreamily.

Janet had manoeuvred to secure a seat beside Donald. In spite of all her artful contriving, she had been unable to have more than a few words with her father's busy general superintendent since her arrival. She noticed the dreamy smile on his face and wondered what could be the cause.

## PIMPLES CAUSED SEVERE ITCHING

On Face, Neck, Hands and Head. Cuticura Healed.

"My skin trouble started with pimples and red blotches that affected my face, neck, hands and head. The pimples were hard, large and red, and festered and scaled over, causing disfigurement. They also caused severe itching and burning, and I could not sleep at night with the pain. The trouble lasted about two months."

"I tried several other remedies which did not give me any relief. I began using Cuticura Soap and Ointment and they helped me after a few applications, and in two weeks I was completely healed." (Signed) Miss Muriel Gibson, Huggert, Alberta.

Use Cuticura to clear your skin. Soap 25c, Ointment 25c and 10c. Talcum 25c. Sold everywhere. Sample free. Address: Cuticura Shaving Stick 25c.

"You seem rather distraught," she said with an arch smile, her dark eyes fixed on his face. "Aren't you enjoying yourself?"

(To Be Continued.)

### Infallible Finger Prints

System Used By Scotland Yard Has Been Greatly Improved

The use and importance of finger prints in the detection of crime is emphasized in a book published by Sir Edward Henry, former commissioner of the Metropolitan Police.

The number of identifications made during 1927 was more than 34 times greater than the largest number effected in a year by the old method. This depended on the unchanging measurements of parts of the human frame.

At Scotland Yard the ring finger of each hand is recorded and the slips are divided into 64 sub-groups. A search among 100,000 slips can be completed within five or six minutes, by a practised officer.

He carries in his eye the salient features of the slip he is looking for and can search for it as rapidly as his hand is able to turn over the record slips.

### Appointed To Railway Board

John A. Stoneman Will Succeed Hon. Frank Oliver

John A. Stoneman, Saskatoon, Sask., has been appointed as a member of the board of railway commissioners, to succeed Hon. Frank Oliver, who recently retired.

Mr. Stoneman is a past president of the United Farmers of Canada, and is at present a member of the Royal Grain Commission, appointed by the Saskatchewan Government to enquire into conditions affecting the grain trade.

It is understood that Mr. Stoneman will take over his new duties on the conclusion of the work of the grain commission.

### Bristling With Thirteens

Superstitious People Should Avoid American Silver Quarter

Londoners have a deeply rooted idea that five shilling pieces are unlucky.

It is very hard, says a writer in Pearson's Weekly, to find the origin of this queer idea, yet it is an absolute fact that many waiters and waitresses hate even to handle a five-shilling piece owing to their fixed belief that it will bring ill luck.

If it were the American silver quarter dollar, one could understand the superstition, continues the article, for surely, of all coins ever minted, this is the most risky. The quarter is twenty-five cents, which roughly corresponds to our shilling, and it simply teems with thirteens.

It has thirteen stars, thirteen letters in the scroll in the eagle's beak, thirteen feathers in the eagle's tail, thirteen parallel bars on the shield, thirteen horizontal stripes, thirteen leaves on the olive branch, thirteen arrow heads and thirteen letters in its name "quarter dollar"—an amazing collection of thirteens!

## A PERFECT MEDICINE FOR LITTLE ONES

Baby's Own Tablets Should Be In Every Home Where There Are Children

The perfect medicine for little ones is found in Baby's Own Tablets. They are a gentle but thorough laxative which regulate the bowels, sweeten the stomach, drive out constipation and indigestion; break up colds and simple fever and promote healthful and refreshing sleep. It is impossible for Baby's Own Tablets to harm even the new-born babe as they are absolutely guaranteed free from opiates or any other injurious drugs. Concerning them Mrs. Earl Taylor, Owen Sound, Ont., writes:—"I have four children and have always used Baby's Own Tablets. I am never without the Tablets in the house as they are the best medicine that I know of for little ones."

Baby's Own Tablets are sold by medicine dealers or by mail for 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### Discover Old Observatory

Instruments, All Of Stone, Are In Excellent Condition

Workmen, digging a cellar in Buetzow, Mecklenburg, discovered an old observatory which archaeologists declare dates from 1181 B.C. A stone circle with markings showing observations on the sun's positions throughout the year served as a chronicle.

The instruments, which are all of stone, were found in excellent condition, and a fair measure of solar altitude can be made even now. Several museums are bidding against one another for the possession of this old Nordic relic.

A telephonic service between Stockholm, Sweden and Buenos Aires, Argentina, a distance of 8,062 miles has been inaugurated.

## Little Helps For This Week

"Not my will but Thine be done," Luke xxii. 42.

Whatever my Father wills is best. Delight or suffering, toil or rest, Thine eye, and Thine alone, can see! What I should have, and do, and be. I only ask that I may know

The way which Thou wouldst have me go;

That I may will in Thine may lose; That what Thou, Lord, for me shalt choose, I, too, may choose.

—C. W. Harris.

There are no disappointments. It has been said, to those whose wills are bound up in the will of God.

—The Light of the Conscience.

The General Sherman Big Tree in the Sequoia National Park, California, estimated to be at least four thousand years old, is still producing an annual crop of cones from which fall millions of fertile seeds.

The first book to be written by a native Canadian was written by a woman and published in 1801. Since that time some 600 authors have published books, many of them of world-wide renown.

## Ward off Flu and Pneumonia

Neglected bronchial colds are dangerous. Stop them instantly with Buckley's Mixture. Its action in relieving the cough and clearing the tubes is amazingly swift—and sure. All druggists sell "Buckley's" under a positive guarantee. Buy a bottle today, and be safe.

W. K. Buckley, Limited, 142 Mutual St., Toronto 2

**BUCKLEY'S** Mixture 522 Acts like a flash—a single slip proves it

75c. and 40c.

## Guard Against FLU — Sore Throat The First Warning.

Few families will escape. This epidemic constitutes a real danger. Health authorities everywhere warn the public of the danger of the common cold. "Flu" usually starts with Sore Throat. Unless the germs are killed by some antiseptic treatment a serious malady may develop.

A simple treatment is to gargle the throat three times daily with Nerville. The antiseptic properties of Nerville quickly destroy the germs in the throat. Of course if the chest is sore Nerville should be rubbed over the affected area—lots of rubbing—it can't burn a blister, but will bring out the congestion and break up the cold.

To prevent "Flu" or colds from gaining headway Nerville will prove most effective. It is hardly necessary to point out that the bowels should be stimulated, and the system purged of all waste materials. For this purpose Dr. Hamilton's Pills are recommended. They act without griping or discomfort of any kind. This combination treatment of Nerville and Dr. Hamilton's Pills will prove a very satisfactory prevention for Grippe, Flu, etc.

## WINDOLITE

The Improved Glass Substitute

MADE IN ENGLAND

COMES WITH A MESSAGE OF HEALTH

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandahs, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 ozs., while a square yard of glass of ordinary thickness, weighs about 135 to 150 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

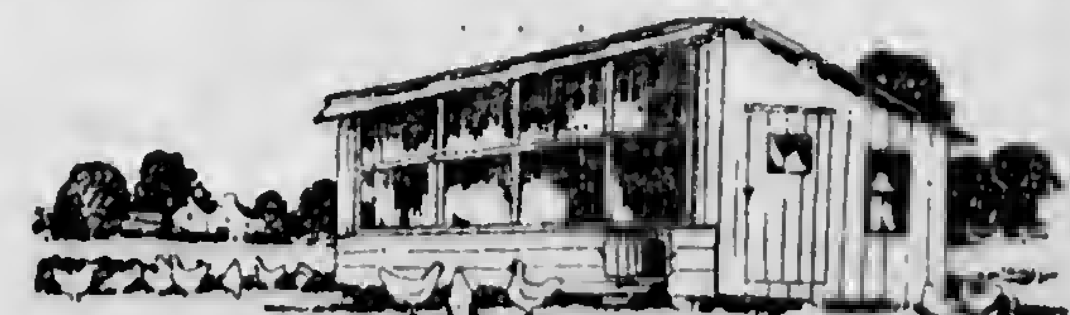

Use WINDOLITE and let YOUR PLANTS YOUR CHICKENS YOUR CATTLE Bask in 100 % Sunlight Send for booklet "WINDOLITE"

THE sun is the all-powerful life producer. Nature's universal disinfectant and germ destroyer, as well as stimulant and tonic. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective among the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding these vital health-giving rays. Therefore, the invention of WINDOLITE has completely satisfied the long-felt want. Exhaustive experiments have conclusively proved that it is a most effective substitute for glass, that it freely admits the Ultra-Violet rays, and that its use has a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of WINDOLITE has during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, increasing the egg-laying capacity and fertility of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.

Distributors: JOHN A. CHANTLER & CO., LTD. 51 Wellington St. W. TORONTO, ONT.

## Once Over—All Over With Three-Fuel Power

Once over is all over for corn planting or seed bed work with a three-fuel Hart-Parr tractor. Hart-Parr owners say that three operations at once is common practice with them. The owner who sent us the picture shown above had his father following directly behind with a two-row cornplanter. He cut his costs right in two. Put Hart-Parr power to work on your farm and get the most power, at the lowest cost, for the longest time. Hart-Parrs have three forward speeds to speed up hauling and field work. Come in and see the improved line for small, medium and large farms.

## At the S. of A.

As these lines are written the students are finishing their last examination which will bring to a close a singularly enjoyable and successful school year. While our enrollment has been small yet we have had a lively spirit existing and the quality of the work has been good.

Preparations are in full swing for the commencement exercises which are to be held Thursday March 28th, at 8:30 in the school auditorium.

The graduation banquet is in charge of Miss Redig. Class Room One. We regret very much that Edna Wilcox has been unable to write her examinations of account of illness.

The second year girls entertained the staff and the first year girls at a delightful afternoon tea.

Mr. and Mrs. Longman have recently entertained at two very enjoyable parties. The first was a dinner party last Sunday in honor of the unattached members of the staff. While the scribe does not happen to come in the above category, sufficient information has been gleaned to indicate that the party was very successful. Mr. Gilbert was included because Mrs. Gilbert was spending the week end with her parents at Claresholm.

The other party was a bridge party. The guests included members of the staff, Mr. and Mrs. Gaetz and Mr. and Mrs. Christie. The home was decorated for St. Patrick's Day and the lunch was typically Irish and needless to say delicious as Mrs. Longman is noted for her lunches.

Mr. Longman reports a profitable trip to Vauxhall recently where he spoke at better seed meetings.

Mr. Asplund made a trip to Glenwood and Hillspring last week where he spoke on Swine Club work. The indications are that Clubs will be organized at both these places.

Mrs. Asplund spent the week end in Lethbridge with her parents.

Mr. Macdonald has completed his dairy course and returned home to Calgary. He was very laudatory in his remarks concerning the quality of butter made by the dairying class.

Mr. Gilbert reports that the School Fair seeds have arrived. These will be distributed shortly.

Mr. Baragar and Mr. McBeath, the temporary members of the staff, will leave shortly. Mr. Baragar will return to his farm at Elm Creek Manitoba while Mr. McBeath will go to the Lacombe Experimental Station where he has spent his summers for several years.

Mr. Smith is outlining weed experiments to be conducted as well as with cultivation methods of eradication.

Field experiments with the use of super-phosphate for alfalfa hay, sugar beets, and cereals are also being projected for this farm. The work with fertilizers including phosphorous, potassium and nitrogen is being extensively undertaken this year. Mr. Longman is supervising the work for the Provincial Department of Agriculture in this district.

We are asking all students and alumni members to co-operate in increasing our attendance next fall so our slogan is: "Each Student Bring A Student."

RISE TO LEADING PARTS FROM EXTRA PARTS IS RAPID.

Joan Crawford, who plays the feminine lead in "Spring Fever," coming to the Capitol Theatre next Monday came to the Metro Goldwyn-Mayer studios direct from the musical comedy stage where she was discovered by Harry Rapf, associate studio executive.

Miss Crawford was known on the stage as Lucille La Sueur. Through a magazine contest she was christened by the movie public as Joan Crawford, and under that name, after six months drilling in the art of screen acting, was signed to join the group of Metro Goldwyn Mayer of stock actors. Her rise to prominence was rapid, for though she only began her screen career in 1925, she has already been feature in several productions.

She was born in San Antonio, Texas, and educated at a girls finishing school in Kansas City. Love of the theatre came to her at an early age. Her father was a theatre owner and he dreamed of the time when she would be old enough to attempt her fortune on the stage. Her parents were opposed to such a career, so Miss Crawford finally ran away from home and went to Chicago to try for a theatrical opening.

Her first stage experience was as a dancer in a review in that city in 1922. Next she appeared in a Shubert production, "Innocent Eyes," in New York, and then was a dancer at the winter garden in "The Passing Show." It was there Mr. Rapf discovered her.

A Chicago Holstein breeder has made a special offer to B. H. Thomson of Braeburn Farm, Bohara, Saskatchewan, for his world champion Holstein cow, Canary Korndyke Alcatraz, but representations are being made to the Provincial Government to have this famous animal retained in the province.

"You don't have to sell the idea of game protection and conservation to sportsmen," said James W. Stuber, well known sporting writer who attended the recent banquet in Montreal of the Quebec Association for the Protection of Fish and Game. "The problem is to convince the settler and guide in the backwoods that a surplus of game for the attraction of the hunter means money in their pockets and a source of revenue to many classes in the community."

Another story of a bull attacking a man comes from Alberta, where the Mercantile Express reports: "One of our local pros was tramping through the hills some miles from Banff, when he looked forward and saw a bull moose coming rapidly toward him. He took to the timber pronto and afterwards discovered that Mr. Moose had established his herd of three or four cows in a secluded spot near and was not going to permit the approach of any strangers."

An effort is being made to establish an airport at Banff, Alberta. Government officials have inspected a site near the present golf links and the prospect that a field will be prepared within the next year is bright.
